Register Crime Measurement Methods Forensic Investigation:

Cross-National Research in Self-Reported Crime and Delinquency Malcolm Klein, 2012-12-06 Malcolm W Klein
Center for Research on Crime and Social Control University of Southern California 1 BACKGROUND In June of 1988 approximately forty scholars and researchers met for four days in the Leeuwenborst Congress Center in Noordwijkerhout The Netherlands to participate in a workshop entitled Self Report Methodology in Criminological Research The participants represented 15 nations and 30 universities and research centers a diversity that was matched by the experiences and focal interests in self report methods among the participants This volume is the result of the workshop process and in particular of the invitations to participants to prepare pre conference papers for distribution prior to the workshop The chapters in the volume were selected from the larger set of pre conference papers As workshop convener and volume editor it falls on me to set some of the context for this enterprise Self report crime is admitted crime derived from interview and questionnaire responses obtained from adults and juveniles regardless of whether or not they have been arrested concerning their own illegal behaviors Growing awareness of the limitations of official crime statistics has led to the development of self report procedures

The Criminal Career Britta Kivsgaard, 2002-11-14 How can the average criminal career be characterized and how common are career criminals Does offending become more specialized and or more serious as people get older Do female careers in crime differ from those of males in substance or only in magnitude Britta Kivsgaard examines these questions through her longitudinal analysis of the life circumstances and criminal pursuits of 45 000 Danish offenders This 2002 book provides a remarkably broad assessment of the full spectrum of criminal career patterns The data unparalleled in size and quality allows powerful analyses of criminal behavior even among relatively small demographic subgroups Kivsgaard is thus able to make solid assessments of offending patterns for males and females juveniles and middle aged adults and employed and unemployed individuals Furthermore she examines the empirical evidence of the effects of deterrence and incapacitation Her findings suggest rehabilitation as an alternative worthy of further research
