Structures Of Social Action Studies In Conversation Analysis:

Structures of Social Action John Maxwell Atkinson, John Heritage, 1989
Atkinson, 1987 Structures of Social Action J. Maxwell Atkinson, 1985-04-04 Bringing together thirteen original papers by leading American and British researchers this volume reflects fresh developments in the increasingly influential field of conversation analysis It begins by outlining the theoretical and methodological foundations of the field and goes on to develop some of the main themes that have emerged from topical empirical research These include the organisation of preference topic non vocal activities and apparently spontaneous responses such as laughter and applause The collection represents the most comprehensive statement yet to be published on this type of research **The Anthem Companion to Harold Garfinkel** Philippe Sormani, Dirk vom Lehn, 2023-07-25 The Anthem Companion to Harold Garfinkel brings together leading scholars and upcoming researchers in contemporary ethnomethodology to bring out the experimental character of Garfinkel s legacy in the social sciences and beyond Therefore the Companion takes its cue from Garfinkel s noted breaching experiments enabling the reflexive investigation of trust conditions in situ and asks how this research interest has been productively pursued and distinctively rearticulated both within and beyond Garfinkel s oeuvre Whilst Garfinkel s experimental legacy is often acknowledged no systematic introduction to its distinctive outlook tension riddled diversification and heuristic interest s is available to date The Anthem Companion to Harold Garfinkel both fills and reflects upon that gap in the literature thereby articulating ethnomethodology s experimental outlook if not recasting its current research directions

inquiry developed by Harvey Sacks Sacks's original analyses concerned with the lived detail of action and language in interaction discoverable in members' actual activities demonstrated a means of doing sociology that had previously seemed impossible. In so doing Sacks provided for highly technical detailed yet stunningly simple solutions to some of the most trenchant troubles for the social sciences relating to language culture meaning knowledge action and social organisation. In this original collection scholars working in a range of different fields including sociology human geography communication and media studies social psychology and linguistics outline the ways in which their work has been inspired influenced and shaped by Sacks's approach as well as how their current research is taking Sacks's legacy forward in new directions. As such the collection is intended to provide both an introduction to and critical exploration of the work of Harvey Sacks and its continued relevance for the analysis of contemporary society.

The Consequentiality of Communication Stuart J. Sigman, 2013-11-05. In a bold attempt to redirect the ways theories of communication are conceived and research on communication processes are conducted this volume questions prevailing communication scholarship that emphasizes the cultural psychological and sociological variables that impact on and or are impacted by communication. Instead of focusing on the consequences of communication this book urges readers to examine the consequentiality of communication what it is about the communication process that enables it to play a defining role in our lives. Communication is not a neutral conveyor of meanings derived from culture cognition or social structure and is not explained by correlations with external variables. Meaning emerges from the communication process itself it is dependent upon what transpires during the real time moments of communicators behaving with each other. To properly study this new paradigm a new vocabulary for thinking about the consequentiality of communication is needed and proposed. Four theoretical orientations are used to stake out this new territory: coordinated management of meaning neo-rhetorical theory conversation analysis and social communication theory. While there are points of agreement and overlap on the need to study communication as inherently consequential there are also differences across the four theories in the value of rules as an explanatory concept on the relationship between structure and process and on the very constitution of a theory. Thus this book has the benefit of articulating a new paradigm for communication scholarship without losing sight of the discipline's rich diversity.
