Roberts,2008-11-27 John T Roberts presents and defends a radically new theory of laws of nature the Measurability Account Though consistent with a Humean ontology Roberts's theory differs sharply from the most influential Humean theory of laws David Lewis's Best System Analysis Unlike other Humean theories the Measurability Account affirms that there is an important sense in which the laws govern the universe rather than simply describing it economically Yet unlike non Humean theories it requires only minimal metaphysical commitments In this way it combines the advantages of Humean and non Humean approaches to laws while avoiding the pitfalls of each At the heart of the Measurability Account are two new ideas that lawhood is not a property of facts but rather a role that a proposition can play within a scientific theory and that what is essential to laws is that they guarantee the reliability of methods of measuring natural quantities On the basis of these ideas Roberts argues that we can offer an informative and compelling explanation of why laws have the peculiar counterfactual resilience that sets them apart from accidental uniformities [Nuclear Theory](#) Judah M.
