industries that supply and promote them and the meanings they have for musicians Winner of the International Association
for the Study of Popular Music IASPM Book Award 1997 Recent innovations in musical instrument design are not simply a
response to the needs of musicians writes Paul Th erge they also have become a driving force with which musicians must
contend He argues that digital synthesizers samplers and sequencers in studio production and in the home have caused
musicians to rely increasingly on manufacturers for both the instruments themselves as well as the very sounds and musical
patterns that they use to make music Musical practices have thus become allied with a new type of consumer practice that is
altogether different from earlier relationships between musicians and their instruments as a means of production Th erge
places these developments within a broad social and historical perspective that examines the development of the musical
instrument industry particularly the piano industry the economic and cultural role of musicians magazines and computer
networks and the fundamental relationships between musical concepts styles and technology **Keyboard** ,1997
