Heim, 2008 In an age of ubiquitous computing it is essential that Interaction Design be based on the rich foundation of HCI research and knowledge The Resonant Interface does that and more It moves beyond the traditional scope of human computer interaction HCI and is based on the concept of active learning that integrates theory and practice Each

chapter begins with a discussion of a particular HCI topic or concept that is then explored and put into perspective for interface design. The topics are then set in a design scenario using authentic interface problems and solutions. With a practical, engaging style, author Steve Heim moves beyond a focus on research findings and extends student learning into the processes of building usable interfaces for software and Web sites.

Guidelines for the Construction, Format, and Management of Monolingual Controlled Vocabularies National Information Standards Organization (U.S.), 2005. This Standard presents guidelines and conventions for the contents display, construction, testing, maintenance, and management of monolingual controlled vocabularies. This Standard focuses on controlled vocabularies that are used for the representation of content objects in knowledge organization systems, including lists, synonym rings, taxonomies, and thesauri. This Standard should be regarded as a set of recommendations based on preferred techniques and procedures. Optional procedures are, however, sometimes described, e.g., for the display of terms in a controlled vocabulary. The primary purpose of vocabulary control is to achieve consistency in the description of content objects and to facilitate retrieval. Vocabulary control is accomplished by three principal methods: defining the scope or meaning of terms using the equivalence relationship to link synonymous and nearly synonymous terms and distinguishing among homographs.
