

DISCOURSE ANALYSIS

Discourse analysis is an approach to the study of language that demonstrates how language shapes reality and reveal dominant ways of thinking an acting.

OVERVIEW

Discourse analysis involves the examination of how the 'ways of speaking about things' normalizes and privileges some frames of thinking about things while marginalizing others.

As a simple example, if movies consistently frame the ideal female as passive, silent, and submissive, then this becomes normalized in the "dominant discourse" of gender.

EXAMPLE

Studying Government Policies: A discourse analysis of policy texts would involve looking at the keywords, metaphors, and phrases used in the text and how they reveal ideological frameworks and viewpoints of the government of the day. These sorts of studies often demonstrate how the language of policy texts normalizes some behaviors and marginalizes others.

Learning Dogan Yuksel, Banu Inan, 2013 Discourse can be understood as the sum of linguistic usages and metalinguistic manners about a social practice. It examines language in use with the help of the tools that would enable us to get a deeper understanding of what is said or unsaid. Analysis of discourse would help us understand social, cultural, psychological, and academic dynamics that are interwoven in the utterances of interlocutors as they use language. This book covers a range of theoretical and applied studies on the examination of discourse in various second and foreign languages learning and teaching contexts. Basically, it includes studies that specifically focus on different aspects of discourse in the teaching of all four skills: reading, writing, listening, and speaking. Three theoretical chapters on conducting discourse analysis research, the use of corpus linguistics, and historical review of discourse analysis perspectives enrich the scope and content of the book. Researchers from different teaching and learning settings, including Turkey, China, and the USA, contributed to this volume. The target audience of the book are undergraduate and graduate students in different foreign and second language departments and teachers, researchers, and academicians of foreign and second languages. *Discourse Perspectives on Second and/or Foreign Language Teaching and Learning* will facilitate the understanding of discourse by portraying empirical and theoretical studies on discourse. It covers quite different perspectives, e.g. sociocultural theory of mind, perspective, critical discourse analysis, and psychological and/or mainstream perspectives of various topics in discourse, e.g. classroom interaction, written discourse, corpus linguistics, oral interviews, discourse of blogs, technology and discourse, etc. The first three chapters provide a review of discourse and how it is conceptualised to various target groups of people, e.g. graduate students, teachers, researchers, and academicians, assuming no prior knowledge. The other chapters focus on different aspects of discourse both in and outside the classroom. This book provides teachers, learners, and researchers of second and/or foreign languages with the tools to analyse and/or examine language inside and outside their classrooms.

Language as Discourse Michael McCarthy, Ronald Carter, 2014-07-22 In this book, Michael McCarthy and Ronald Carter describe the discursive properties of language and demonstrate what insights this approach can offer to the student and teacher of language. The authors examine the relationship between complete texts, both spoken and written, and the social and cultural contexts in which they function. They argue that the functions of language are often best understood in a discursive environment and that exploring language in context compels us to revise commonly held understandings about the forms and meanings of language. In so doing, the authors argue the need for language teachers, syllabus planners, and curriculum organisers to give greater attention to language as discourse.
