Filar, Vladimir Grigor'evich Gaitsgory, Koichi Mizukami, 2000 Modern game theory has evolved enormously since its inception in the 1920s in the works of Borel and von Neumann and since publication in the 1940s of the seminal treatise Theory of Games and Economic Behavior by von Neumann and Morgenstern The branch of game theory known as dynamic games is to a significant extent descended

from the pioneering work on differential games done by Isaacs in the 1950s and 1960s. Since those early decades, game theory has branched out in many directions spanning such diverse disciplines as mathematics, economics, electrical and electronics engineering, operations research, computer science, theoretical ecology, environmental science, and even political science. The papers in this volume reflect both the maturity and the vitality of modern day game theory in general and of dynamic games in particular. The maturity can be seen from the sophistication of the theorems, proofs, methods, and numerical algorithms contained in these articles. The vitality is manifested by the range of new ideas, new applications, the number of young researchers among the authors, and the expanding worldwide coverage of research centers and institutes where the contributions originated.

Advances in Dynamic Games and Applications Tamer Başar, Alain Haurie, 1994. Recent years have witnessed a surge of activity in the field of dynamic both theory and applications. Theoretical as well as practical games in problems in zero sum and nonzero sum games, continuous time differential and discrete time multistage games, and deterministic and stochastic games are currently being investigated by researchers in diverse disciplines such as engineering, mathematics, biology, economics, management science, and political science. This surge of interest has led to the formation of the International Society of Dynamic Games (ISDG) in 1990, whose primary goal is to foster the development of advanced research and applications in the field of game theory. One important activity of the Society is to organize biannually an international symposium which aims at bringing together all those who

contribute to the development of this active field of applied science In 1992 the symposium was organized in Grimentz Switzerland under the supervision of an international scientific committee and with the help of a local organizing committee based at University of Geneva This book which is the first volume in the new Series Annals of the International Society of Dynamic Games see the Preface to the Series is based on presentations made at this symposium It is however more than a book of proceedings for a conference Every paper published in this volume has passed through a very selective refereeing process as in an archival technical journal

New Trends in Dynamic Games and Applications Jan G. Olsder, 1995-12-01 The theory of dynamic games is very rich in nature and very much alive If the reader does not already agree with this statement I hope he she will surely do so after having consulted the contents of the current volume The activities which fall under the heading of dynamic games cannot easily be put into one scientific discipline On the theoretical side one deals with differential games difference games the underlying models are described by differential respectively difference equations and games based on Markov chains with deterministic and stochastic games zero sum and nonzero sum games two player and many player games all under various forms of equilibria On the practical side one sees applications to economics stimulated by the recent Nobel prize for economics which went to three prominent scientists in game theory biology management science and engineering The contents of this volume are primarily based on selected presentations made at the Sixth International Symposium on Dynamic Games and Applications held in St Jovite Quebec Canada 13 15 July 1994 Every paper that appears in this volume has passed through a stringent reviewing process as is the case with publications for archival technical journals This conference as well as its predecessor which was held in Grimentz 1992 took place under the auspices of the International Society of Dynamic Games ISDG established in 1990 One of the activities of the ISDG is the publication of these Annals The contributions in this volume have been grouped around five themes
