Acquisition Thomas Wetter, 1992 Methodological knowledge acquisition and knowledge engineering have

achieved increasing attention in recent years due both to active research projects and to successful practical applications. Both aspects have over the years been reflected in the structure of the European Knowledge Acquisition Workshops (EKAW), where a users forum has always been combined with a scientific workshop. This volume contains the proceedings of EKAW 92. The papers are organized into five thematic sections on Technology transfer, General modelling approaches, Knowledge formalization and automated methods, Elicitation and diagnosis of human knowledge, Practice and experiences of knowledge acquisition. A total of 65 persons from around the world served as the program committee. Their recommendations and sometimes very detailed comments helped both workshop organizers and individual authors to achieve the high quality reflected in this volume.
