Origami In Engineering And Architecture:

Architecture Education in the Changing World Madhumita Roy, Jayashree Deshpande, Nandini Kulkarni, 2025-04-30 This International Conference aimed to provide a platform for bringing out research and innovative ideas to shape education for the future of the built environment in the context of emerging technologies and environments and the National Education Policy. The conference served as an important platform for reflection, dialogue, and action. It aimed to explore intersections bringing together educators, practitioners, researchers, and students from around the world to engage in a dialogue that transcends traditional boundaries and encourages interdisciplinary collaboration to explore how architectural education can and should evolve in response to the global challenges. The themes of this conference invited deliberation on established pedagogies, new technologies, and the pressing need for sustainability in design. It encouraged perspectives on the role of architects in society and the forms of knowledge and skills that future professionals would require to shape a better, more resilient world.

Structures and Architecture Paulo J. Cruz, 2013-06-27 Although the disciplines of architecture and structural engineering have both experienced their own historical development, their interaction has resulted in many fascinating and delightful structures. To take this interaction to a higher level, there is a need to stimulate the inventive and creative design of architectural structures and to persuade

Mars Architecture Amjad Almusaed, Ibrahim Yitmen, Asaad Almssad, 2025-06-26 This book combines Construction 6.0 with AEC principles for designing sustainable, health-focused Martian habitats. It unveils innovative architectural designs ideal for Mars, utilizing 3D printing, autonomous robotics, and regolith alongside renewable energy and life support systems. With an emphasis on well-being, it integrates biophilic design and digital technologies to enhance operational efficiency. Exploring various habitat models, it advocates a multidisciplinary approach to extraterrestrial colonization that balances technological advancement with environmental and ethical stewardship, aiming to make human life on Mars a healthy and sustainable reality.

The Architectural Model Matthew Mindrup, 2019-10-08 An investigation of different uses for the architectural model through history as sign, souvenir, funerary object, didactic tool, medium for design, and architect's muse. For more than five hundred years, architects have employed three-dimensional models as tools to test, refine, and illustrate their ideas. But as Matthew Mindrup shows, the uses of physical architectural models extend beyond mere representation. An architectural model can also simulate, instruct, inspire, and generate architectural designs. It can be among other things, sign, souvenir, toy, funerary object, didactic tool, medium, or muse. In this book, Mindrup surveys the history of architectural models by

investigating their uses both theoretical and practical Tracing the architectural model's development from antiquity to the present Mindrup also offers an interpretive framework for understanding each of its applications in the context of time and place He first examines models meant to portray extant fantastic or proposed structures describing their use in ancient funerary or dedicatory practices in which models are endowed with magical power as a medium for architectural reverie and inspiration and as prototypes for twentieth century experimental designs Mindrup then considers models that exemplify certain architectural uses exploring the influence of Leon Battista Alberti's dictum that models be simple lest they distract from the architect's ideas analyzing the model as a generative tool and investigating allegorical analogical and anagogical interpretations of models Mindrup's histories show how the model can be a surrogate for the architectural structure itself or for the experience of its formal tactile and sensory complexity and beyond that that the manipulation play experimentation and dreaming enabled by models allow us to imagine architecture in new ways
