Chapter 2 One-Dimensional Kinematics Q.1CQ

You and your dog go for a walk to a nearby park. On the way, your dog takes many short side trips to chase squirrels, examine fire hydrants, and so on. When you arrive at the park, do you and your dog have the same displacement? Have you traveled the same distance? Explain.

Solution:

The displacement is the same for the dog and us, while the distance traveled by the dog is greater than the distance traveled by us.

Chapter 2 One-Dimensional Kinematics Q.1P

Referring to Figure you walk from your home to the library, then to the park. (a) What is the distance traveled? (b) What is your displacement?

Prantil,Timothy Decker,2022-05-31 In teaching an introduction to transport or systems dynamics modeling at the undergraduate level it is possible to lose pedagogical traction in a sea of abstract mathematics What the mathematical modeling of time dependent system behavior offers is a venue in which students can be taught that physical analogies exist between what they likely perceive as distinct areas of study in the physical sciences We introduce a storyline whose characters are superheroes that store and dissipate energy in dynamic systems Introducing students to the overarching conservation laws helps develop the analogy that ties the different disciplines together under a common umbrella of system energy In this book we use the superhero cast to present the effort flow analogy and its relationship to the conservation principles of mass momentum energy and electrical charge We use a superhero movie script common to mechanical electrical fluid and thermal engineering systems to illustrate how to apply the analogy to arrive at governing differential equations describing the systems behavior in time Ultimately we show how only two types of differential equation and therefore two types of system response are possible This novel approach of storytelling and a movie script is used to help make the mathematics of lumped system modeling more approachable for students Table of Contents Preface Acknowledgments If You Push It It Will Flow Governing Dynamics The Electrical Cast The Mechanical Cast A Common Notion Going Nowhere The Fluid and Thermal Casts Summary Afterword Bibliography Authors Biographies Physics for Scientists and Engineers Richard Wolfson,1999 **Mathematics Catalog 2005** Neil Thomson,2004-10 **Physics with Modern Physics for Scientists and Engineers** Richard Wolfson,Jay M.
