Sams Teach Yourself Borland C++ Builder 4 in 24 Hours Kent Reisdorph, 1999 Artful Making offers the first proven research based framework for engineering ingenuity and innovation This book is the result of a multi year collaboration between Harvard Business School professor Robert Austin and leading theatre director and playwright Lee Devin Together

they demonstrate striking structural similarities between theatre artistry and production and today's business projects and show how collaborative artists have mastered the art of delivering innovation on cue on immovable deadlines and budgets. These methods are neither mysterious nor flaky; they are rigorous, precise, and with this book's help, absolutely learnable and reproducible. They rely on cheap and rapid iteration rather than on intensive up-front planning, and with the help of today's enabling technologies, they can be applied in virtually any environment with knowledge-based outputs. Moreover, they provide an overarching framework for leveraging the full benefits of today's leading techniques for promoting flexibility and innovation, from agile development to real options.

Annotation: *Writing Stored Procedures for Microsoft SQL Server* will focus on teaching the reader not only how to build effective stored procedures but also on how to optimize and streamline them for long-term use. The reader will be provided with an understanding of how SQL Server interprets stored procedures versus direct access via SQL queries. This will be followed by detailed instructions on creating and maintaining a repository of stored procedures. Once the reader knows how stored procedures are created and built, they will be taught how to determine which logic within an application makes sense to be put into this scheme. Additionally, they will be provided with guidance on making stored procedures that are portable across applications. Some of the specific topics covered in *Writing Stored Procedures with Microsoft SQL Server* will include: How SQL Server interprets stored procedures and SQL statements; Designing, building, and implementing stored procedures; Creating stored procedures that can be used in multiple applications; Working with Indexes, Views, and Triggers in stored procedures; Building business logic into stored procedures; Componentizing database access and Accepting parameters in stored procedures. **The Waite Group's C++ Primer Plus** Stephen Prata, 1998.
