Wang,Norman C. Pereira,2012-12-06 The past few years have seen the emergence of a growing widespread desire in this country and indeed everywhere that positive actions be taken to restore the quality of our environment and to protect it from the degrading effects of all forms of pollution air noise solid waste and water Since pollution is a direct or indirect consequence of waste if there is no waste there can be no pollution and the seemingly idealistic demand for zero discharge can be construed as a demand for zero waste However as long as there is waste we can only attempt to abate the consequent pollution by converting it to a less noxious form In those instances in which a particular type of pollution has been recognized three major questions usually arise 1 How serious is the pollution 2 Is the technology to abate it available and 3 Do the costs of abatement justify the degree of abatement achieved The principal intention of this series of books is to help the reader to formulate answers to the last two of the above three questions The traditional approach of applying tried and true solutions to specific pollution problems has been a major factor contributing to the success of environmental engineering and in large measure has accounted for the establishing of a methodology of pollution control **Advanced Air and Noise Pollution Control** Lawrence K. Wang,Norman C. Pereira,Yung-Tse Hung,2007-11-03 Leading pollution control educators and practicing professionals describe how various combinations of different cutting edge process systems can be arranged to solve air noise and thermal pollution problems Each chapter discusses in detail a variety of process combinations along with technical and economic evaluations and presents explanations of the principles behind the designs as well as numerous variant designs useful to practicing engineers The emphasis throughout is on developing the necessary engineering solutions from fundamental principles of chemistry physics and mathematics The authors also include extensive references cost data design methods guidance on the installation and operation of various air pollution control process equipment and systems
