stage has important implications for their health and productivity Ruminants host a taxonomically diverse microbiota in their rumen which is generally considered to be the most efficient natural fermentation system Rumen microorganisms facilitate the degradation of otherwise indigestible plant fibres into absorbable compounds such as proteins and volatile fatty acids the main source of energy and nutrition for ruminants They are composed of a complex and dynamic assembly of bacteria fungi archaea protozoa and viruses Diets and additives directly affect the number and viability of rumen microorganisms Farm Boys' and Girls' Leader ,1920 Elementary School Library Collection Linda L.
