

# Frequency Table

A **frequency table** is a way of organising collected data. To do this we draw a table with **three columns**:

- The first column is for the different items in the data set.
- The second column is for the tally marks.
- The last column is the frequency column where we can add up the tally marks and write in the corresponding frequencies.

We can add up all of the frequencies to find the total frequency of the set of data.

E.g. Colours of 12 shirts in a wardrobe,

blue	pink	blue	white	white	blue
black	white	blue	pink	blue	white

Colour	Tally marks	Frequency
Black		1
Blue		5
Pink		2
White		4
		Total = 12
