

## Gradient concept

In addition to color swatches, you can use the ability to apply various gradients to objects.

1 With the circle selected, click the **Tools Panel** button on the toolbar, set the **Type** to **Linear** to apply a default gradient. Drag across your object to create a custom path for the gradient.

2 Drag across the artwork to change the length and direction of the gradient path, and drag the midpoint marker to change the midpoint of the gradient between the current colors.

3 Rotate the circle along the axis to apply a blue radial gradient, which can then be moved along the gradient path.

With the circle selected, click the **Tools Panel** button on the toolbar, set the **Type** to **Linear** to apply a default gradient. Drag across your object to create a custom path for the gradient.

With the circle selected, click the **Tools Panel** button on the toolbar, set the **Type** to **Linear** to apply a default gradient. Drag across your object to create a custom path for the gradient.

An alternative to an address bar is working with gradients directly on the object. There is a **Gradients** editor available from the **Color** window on the toolbar. This **Color** gives you high precision drag positioning as well as a few additional options.

For use with **Elliptical** and **Radial** gradients, a **Color** window is a useful way to **Gradients**. To create a **Gradients** gradient, use the **Type** pull-down menu on the left. **Gradients** are available on the **Color** & **Gradients** window.
