MARKET TIMING FOR THE INVESTOR BC Low, The task of timing of market tops and bottoms is a huge challenge for investors and traders

Intuitively we look for market bottoms to buy and market tops to sell basically timing the market This book showcases a new approach that technically picks market tops and bottoms for various trends short to long term using an innovation of the Directional Movement Index DMI created by pioneer master technician Welles Wilder The innovation is named the Triple DMI System The author's first title Integrating Technical Analysis for the Investor helps the investor to integrate technical analysis for investing This title completes the approach by helping the investor to technically time the market **Trading Time** Shaun Downey, 2007 Trading Time a double meaning referring to the allocation of the time to trade and also understanding the critical information regarding where you are in time when a trade is placed This facet of time has many characteristics The timeframe of the chart that was used How critical is the immediate price action directly after the trade is placed At what point in time is the trade within the trend or are we at the end of the trend How strong is the trend based on the time it has existed What is the risk and expectation in relationship to time What is the dominant and correct time frame to be trading Obtaining a true measure of expectation in any one period of time is critical to improving the chances of success Fear and greed can be removed from the equation providing a framework for the good trader and an understanding of risk and expectation to the new one This book looks at the characteristics of time in detail using proprietary studies that analyse time through referencing each part of the day to its previous behaviour at similar periods previously This creates a true measure of momentum and allows for fixed reference points that understand normal and unusual behaviour in multiple time frames at the same time This means the trader no longer has to wait for the current bar to finish before he can implement trades as many of the studies reference the opening price and not the close unlike many established momentum based concepts New studies such as Oasis Volatility Time Bands Range Deviation Pivots Time Average Bands and Trade Flow provide short term day trading opportunities giving exact support and resistances as low as the next 10 minutes These can then be connected and quantified with original methods and concepts using Steidlmayer's Market Profile The second
