Brown, 2008-01-17 How to build a more just world and save the planet. We should all heed Brown's advice. Bill Clinton. In this updated edition of the landmark *Plan B*, Lester Brown outlines a survival strategy for our early twenty-first century civilization. The world faces many environmental trends of disruption and decline, including rising temperatures and spreading water shortage. In addition to these looming threats, we face the peaking of oil, annual population growth of 70 million, a widening global economic divide, and a growing list of failing states. The scale and complexity of issues facing our fast-forward world have no precedent. With *Plan A* (business as usual), we have neglected these issues for too long. In *Plan B 3.0*, Lester R. Brown warns that the only effective response now is a World War II type mobilization, like that in the United States after the attack on Pearl Harbor.
