Data Mining Smu

Michael Rajnik

Data Mining Smu:

2002 IEEE International Conference on Data Mining Vipin Kumar, 2002 Consists of 72 full papers and 49 short papers from the December 2002 conference on the design analysis and implementation of data mining theory systems and applications Topics of the full papers include evolutionary time series segmentation for stock data mining cluster merging and splitting

Ethics in Online AI-Based Systems Santi Caballé, Joan Casas-Roma, Jordi Conesa, 2024-04-10 Recent technological advancements have deeply transformed society and the way people interact with each other Instantaneous communication platforms have allowed connections with other people forming global communities and creating unprecedented opportunities in many sectors making access to online resources more ubiquitous by reducing limitations imposed by geographical distance and temporal constraints These technological developments bear ethically relevant consequences with their deployment and legislations often lag behind such advancements Because the appearance and deployment of these technologies happen much faster than legislative procedures the way these technologies affect social interactions have profound ethical effects before any legislative regulation can be built in order to prevent and mitigate those effects

Ethics in Online AI Based Systems Risks and Opportunities in Current Technological Trends features a series of reflections from experts in different fields on potential ethically relevant outcomes that upcoming technological advances could bring about in our society Creating a space to explore the ethical relevance that technologies currently still under development could have constitutes an opportunity to better understand how these technologies could or should not be used in the future in order to maximize their ethically beneficial outcomes while avoiding potential detrimental effects Stimulating reflection and considerations with respect to the design deployment and use of technology will help guide current and future technological advancements from an ethically informed position in order to ensure that tomorrow such advancements could contribute towards solving current global and social challenges that we as a society have today This will not only be useful for researchers and professional engineers but also for educators policy makers and ethicists Investigates how intelligent technological advances might be used how they will affect social interactions and what ethical consequences they might have for society Identifies and reflects on questions that need to be asked before the design deployment and application of upcoming technological advancements aiming to both prevent and mitigate potential risks as well as to identify potentially ethically beneficial opportunities Recognizes the huge potential for ethically relevant outcomes that technological advancements have and take proactive steps to anticipate that they be designed from an ethically informed position Provides reflections that highlight the importance of the relationship between technology their users and our society thus encouraging informed design and educational and legislative approaches that take this relationship into account

Advances in Communication, Devices and Networking Sourav Dhar, Dinh-Thuan Do, Samarendra Nath Sur, Chuan-Ming Liu, 2023-07-07 This book covers recent trends in the field of devices wireless communication and networking It gathers selected papers

presented at the 6th International Conference on Communication Devices and Networking ICCDN 2022 which was organized by the Department of Electronics and Communication Engineering Sikkim Manipal Institute of Technology Sikkim India on December 16 17 2022 Gathering cutting edge research papers prepared by researchers engineers and industry professionals it helps young and experienced scientists and developers alike to explore new perspectives and offer them inspirations on how to address real world problems in the areas of electronics communication devices and networking

Computer Vision and Robotics Praveen Kumar Shukla,Himanshu Mittal,Andries Engelbrecht,2023-10-29 This book consists of a collection of the high quality research articles in the field of computer vision and robotics which are presented in the International Conference on Computer Vision and Robotics CVR 2023 organized by BBD University Lucknow India during 24 25 February 2023 The book discusses applications of computer vision and robotics in the fields like medical science defence and smart city planning The book presents recent works from researchers academicians industry and policy makers

Transactions of Society for Mining, Metallurgy, and Exploration, Inc ,1991 Transactions of Society of Mining Engineers, Inc ,1986

Smart Business and Digital Transformation Sándor Gyula Nagy,Tamás Stukovszky,2023-06-15 Beginning in the mid 2010s the Fourth Industrial Revolution has seen remarkable changes in information technology that have blurred the boundaries between the physical digital and biological worlds Industry 4 0 has enabled so called smart factories in which computer systems equipped with machine learning algorithms can learn and control robotics with minimal need for human input While smart technology has enabled many manufacturing businesses to increase efficiency and cut costs many others are still struggling with implementing it This book aims to help students practitioners and industry leaders to become change agents and take their first steps on the path of transformation Smart Business and Digital Transformation addresses the challenge of becoming smart from three different perspectives smart factory smart industry and smart environment Covering technologies including the Internet of Things IoT cloud artificial intelligence AI mobility 5G and big data analytics the book shows how enterprises can take advantage of them and ultimately beat the competition The book considers the importance of operational processes business models and organisational culture The contributing authors and editors based at Corvinus University present a multidimensional picture of Industry 4 0 which is both diverse in its voices and unified in its vision Smart Business and Digital Transformation meets the growing demand for a textbook that not only presents the latest concepts and theories but is also practical for planning managing and implementing digital transformation in practice The chapters include case studies to demonstrate the practical applications and each chapter ends with review and discussion questions to develop students skills and competencies Students of business and digital transformation on advanced undergraduate and MBA courses will find it an indispensable guide to a vibrant and challenging topic
