

EBOS® pump audits, start-up and condition monitoring services will reveal a wide range of information about your pumps, including:

- Their energy efficiency
- Their actual performance
- The efficiency of the complete hydraulic system

Without facts and figures to back up your work, you can't do a cost-effective job. Our engineers will conduct an audit to assess

your existing plant – even

through videoconferencing and telepresence. We will collect Whole Life Costs and provide payback analysis, giving you hard evidence on which you can base your decisions.

Rebuilding rotodynamic compressors to be the most cost-effective solution, EBOS Pump Services offers

engineering capabilities that we can help you to help your processing. We offer performance, and cost, modelling and up-rotation capacity, for improved performance and reliability. This procedure can include a full

rebuild upgrade, with the ability to improve inlet areas or design by the original components. There will be no need to carry out unnecessary modifications to increase the speed, and pumps and spares will be fully interchangeable with originals.
