

A 3D finite element model of a pile group in soil. The model shows a cross-section of the soil with a color gradient from blue at the top to red at the bottom, representing different soil layers or stress distributions. Five vertical piles are shown, connected by a horizontal cap. The soil is discretized into a mesh of elements. The piles are represented by vertical cylinders. The overall shape is roughly rectangular, with a wider top and bottom and narrower sides.
