The De Gruyter Handbook of Automated Futures Vaike Fors, Martin Berg, Meike Brodersen, 2024-09-23 How does automation affect us our environment and our imaginations What actions should we take in response to automation Beyond grand narratives and technology driven visions of the future what more can automation offer With these questions in mind *The De Gruyter Handbook of Automated Futures* provides a framework for thinking about and implementing automation differently It consolidates automated futures as an inter and transdisciplinary research field embedding the imaginaries interactions and impacts of automation technology within their social historical societal cultural and political contexts Promoting a critical yet constructive and engaging agenda the handbook invites readers to collaborate with rather than resist automation agendas It

Methodologically, the handbook is underpinned by a pedagogical approach to staging co-learning and co-creation of automated futures with rather than simply for people. In this way, the handbook encourages readers to explore new and alternative modes of research, fostering a deeper engagement with the evolving landscape of automation.
