*Essays on Strategy Analysis for Seaports* Elvira Haezendonck, 2001 The increasingly competitive market environment in which port clusters operate today imposes new requirements on port strategy analysis Many port authorities and port operators now realize that a static approach to cost leadership a sole focus on inherited factor advantages and a simplistic reliance on new infrastructure to attract or retain clients are no longer sufficient to guarantee a port's competitive success They need to offer greater value added to port users as well as to society Hence this new market environment forces ports to reconsider their present strategic position and to reflect on the strategic options for the future The book builds upon an in depth survey of economic actors in the Antwerp seaport cluster with a specific focus on the container and conventional cargo clusters It attempts to answer the question why these particular port clusters are more competitive than similar clusters in other ports In order to answer this question the study develops and extends a number of formal tools of strategy analysis that should be useful to both port authorities and port operators

former market leader fell back to the third place of the industry Analysts of the video game entertainment industry even recommended that Nintendo withdraw completely from the highly competitive console market in order to concentrate on developing software 4 However Nintendo refused to surrender but they were in biggest need to recover market share Nintendo had a very different approach to strategy than Sony or Microsoft Instead of competing for core gamers Nintendo tried to expand the market and to win new cus

Low-cost carrier industry: A focus on Germanwings strategy Volker Küpper,2008-05-16 Essay from the year 2007 in the subject Business economics General grade 1 0 Edinburgh Napier University course Economics of Business Strategy language English abstract Since the world s first airline company has been established German Airship Transport Corporation in 1909 especially the new style of low cost airlines increased the competition on the market for commercial flights Towards the end of the century low cost airlines offered first no frills products at a low price The concept originated in the U S before it spread to Europe in the early 1990 s and subsequently to the rest of the world Chan 2000 One main reason for the accelerated increase of low cost flights can be seen in the EU enlargement where open skies arrangements were extended As a result low cost routes were established by existing and new operators The main characteristic of this new strategic orientation was the lower operating cost structure than this of the traditional market participants The traditional airline industry had to face an essential change in the market with an increase of competition and new business models Focusing on Europe there were only a few low cost airlines before the year of 2000 However today about 60 low cost carriers moved mainstream in Europe with a total market share of 24% whereas in Germany 23 low cost airlines operate Berster 2007 To evaluate the specific strategy of Germanwings it is necessary to set limits to the field of study After introducing the company itself the strategic position will be evaluated by focusing on Germany Thus Germanwings will be compared to the operators acting in this country Therefore it is useful to introduce a strategic mapping and the analysis of price practices focusing on Germanwings Furthermore important individual measures of the company will be explained which soften the impact of the above mentioned external influencing factors PEST analysis Finally some up to date measures of the company will conclude its strategic orientation
