Tracking and Data Fusion Yaakov Bar-Shalom, Peter K. Willett, Peter K. Willett, Xin Tian, 2011 *Distributed Data Fusion for Network-Centric Operations* David Hall, Chee-Yee Chong, James Llinas, Martin Liggins II, 2017-12-19 With the recent proliferation of service oriented architectures SOA cloud computing technologies and distributed interconnected systems distributed fusion is taking on a larger role in a variety of applications from environmental monitoring and crisis management to intelligent buildings and defense Drawing on the work of leading experts around the world Distributed Data Fusion for Network Centric Operations examines the state of the art of data fusion in a distributed sensing communications and computing environment Get Insight into Designing and Implementing Data Fusion in a Distributed Network Addressing the entirety of information fusion the contributors cover everything from signal and image processing through estimation to situation awareness In particular the work offers a timely look at the issues and solutions involving fusion within a distributed network enterprise These include critical design problems such as how to maintain a pedigree of agents or nodes that receive information provide their contribution to the dataset and pass to other network components The book also tackles dynamic data sharing within a network centric enterprise distributed fusion effects on state estimation graph theoretic methods to optimize fusion performance human engineering factors and computer ontologies for higher levels of situation assessment A comprehensive introduction to this emerging field and its challenges the book explores how data fusion can be used within grid distributed and cloud computing architectures Bringing together both theoretical and applied research perspectives this is a valuable reference for fusion researchers and practitioners It offers guidance and insight for those working on the complex issues of designing and implementing distributed decentralized information fusion [Analytic Combinatorics for Multiple Object Tracking](#) Roy Streit, Robert Blair Angle, Murat Efe, 2020-11-26 The book shows that the analytic combinatorics AC method encodes the combinatorial problems of multiple object tracking without information loss into the derivatives of a generating function GF The book lays out an easy to follow path from theory to practice and includes salient AC application examples Since GFs are not widely utilized amongst the tracking community the book takes the reader from the basics of the subject to applications of theory starting from the simplest problem of single object tracking and advancing chapter by chapter to more challenging multi object tracking problems Many established tracking filters e.g. Bayes Markov PDA JPDA IPDA JIPDA CPHD PHD multi Bernoulli MBM LMBM and MHT are derived in this manner with simplicity economy and considerable clarity The AC method gives significant and fresh insights into the modeling assumptions of these filters and thereby also shows the potential utility of various approximation methods that are well established techniques in applied mathematics and physics but are new to tracking These unexplored possibilities are reviewed in the final chapter of the book **Academic Press Library in Signal Processing** Fulvio Gini, Nikolaos D. Sidiropoulos, 2013-09-10 This second volume edited and authored by world leading experts gives a review of the principles methods and techniques of important

and emerging research topics and technologies in communications and radar engineering With this reference source you will Quickly grasp a new area of research Understand the underlying principles of a topic and its application Ascertain how a topic relates to other areas and learn of the research issues yet to be resolved Quick tutorial reviews of important and emerging topics of research in array and statistical signal processing Presents core principles and shows their application Reference content on core principles technologies algorithms and applications Comprehensive references to journal articles and other literature on which to build further more specific and detailed knowledge Edited by leading people in the field who through their reputation have been able to commission experts to write on a particular topic
