The Harvard Dictionary of Music Don Michael Randel, 2003-11-28 This classic reference work, the best one-volume music dictionary available, has been brought completely up to date in this new edition. Combining authoritative scholarship and lucid, lively prose, the Fourth Edition of *The Harvard Dictionary of Music* is the essential guide for musicians, students, and everyone who appreciates music. The *Harvard Dictionary of Music* has long been admired for its wide range as well as its reliability. This treasure trove includes entries on all the styles and forms in Western music, comprehensive articles on the music of Africa, Asia, Latin America, and the Near East, descriptions of instruments enriched by historical background, and articles that reflect today's beat, including popular music, jazz, and rock. Throughout this Fourth Edition, existing articles have been fine-tuned, and new entries added so that the dictionary fully reflects current music scholarship and recent developments in musical culture. Encyclopedia-length articles by notable experts alternate with short entries for quick reference, including definitions and identifications of works and instruments. More than 220 drawings and 250 musical examples enhance the text. This is an invaluable book that no music lover can afford to be without. *The Musical Times and Singing-class Circular*, 1922

Hymns and Constructions of Race Erin Johnson-Williams, Philip Burnett, 2024-02-07 *Hymns and Constructions of Race* Mobility Agency De Coloniality examines how the hymn historically and today has reinforced, negotiated, and resisted constructions of race. It brings together diverse perspectives from musicology, ethnomusicology, theology, anthropology, performance studies, history, and postcolonial scholarship to show how the hymn has perpetuated, generated, and challenged racial identities. The global range of contributors covers a variety of historical and geographical contexts, with case studies from China and Brazil to Suriname and South Africa. They explore the hymn as a product of imperialism and settler colonialism and as a vehicle for sonic oppression and/or resistance within and beyond congregational settings. The volume contends that the lived tradition of hymn singing, with its connections to centuries of global Christian mission, is a particularly apt lens for examining both local and global negotiations of race, power, and identity. It will be relevant for scholars interested in religion, music, race, and postcolonialism.
