Building the 21st Century Home David Rudlin, Nicholas Falk, 1999 The book reviews the way that planning policies architectural trends and economic forces have undermined the viability of urban areas in Britain since the Industrial Revolution Now that much post war planning philosophy is being discredited we are left with few urban models other than garden city inspired suburbia Are these appropriate in the 21st century given environmental concerns demographic change social and economic pressures The authors suggest that these trends point to a very different urban future If the 19th century home was the terrace and the 20th century was the suburban semi what will be the 21st century home In the 21st century it is likely that a change will take place in the way that we build our towns and cities as dramatic as that brought about by the garden city pioneers a hundred years ago Change should not however be brought about by regulation or by forcing people against their

will to return to towns and cities Instead this book argues that we must reform our towns and cities so that they become attractive humane places where people will choose to live The Sustainable Urban Neighbourhood is a model for such reform and the book describes what this would look like and how it might be brought about David Rudlin BA MTP and Dr Nicholas Falk MBA are directors of URBED The Urban and Economic Development Group a not for profit consultancy which has been working since 1976 to devise practical solutions to the problems of urban areas They were responsible for the 21st Century Homes Building to Last report for the Joseph Rowntree Foundation which first developed the notion of the Sustainable Urban Neighbourhood David Rudlin is a town planner and urban designer and has been closely involved in the redevelopment of the Hulme Guide to Development He was also a member of an advisory panel responsible for drawing up the Manchester Guide to Development Nicholas Falk is an economist and strategic planner who formerly worked for the Ford Motor Company before establishing URBED in 1976 He has written and lectured widely on urban issues and was the principle author of Vital and Viable Town Centres Meeting the Challenge for the Department of the Environment Explore how to combine social environmental and economic thinking with urban design Benefit from Rudlin and Falk s expertise in urban planning and development **Journal of the Royal Society of Arts** ,1984 *European Port Cities in Transition* B. Congress,1972 **Resurgence** ,1985 Why France Collapsed Guy Chapman,1968 The history of the conquest of Gaul it has been said would be far more obscure if twenty of Caesar s generals had written commentaries In June 1940 the armies of France Great Britain and Belgium succumbed to the onslaught of the German armies in less than six weeks How

this could have come about has hardly been illuminated by the accusations and counter accusations of prominent French politicians and senior officers The crossfire of charges is as blinding as a hailstorm This book is a bold attempt to clarify responsibilities and to answer the question of how an army not greatly inferior to the enemy s and only ten years before believed to be the strongest in Europe met such an ignominious defeat First it tells the story of the reconstitution of the army after 1919 and of the French defence preparations It shows the chiefs of staff lack of imagination how dull were their analyses of the recent war how blind they were to the outside world how negligent of such matters as the increase in speeds and range of armaments how incurious as to their enemies and how subservient to the politicians who courted an electorate which loathed war but was not ready to pay for peace while an out of date armament industry existed on high protective tariffs In 1939 France had an army and an air force trained for defeat **Municipal Journal** ,1985 *The Chautauquan* ,1889 **Scientific American** ,1882 *The North-China Herald and Supreme Court and Consular Gazette* ,1912
