

Cooling Theory Lectures Notes

Markus Hupfer and members of the team!

September 7, 2024

These are the notes for the first lecture. I have not gone through and given feedback on all of the lecture plans, but for the convenience of the faculty on the lecture, the faculty contribution to Cooling Theory and the book of Markus and Peter (forthcoming at Springer) studies. I also used several other sources for additional material. In Part II, some parts of Knowledge on Cooling Theory and Thermodynamics given by Professor John Kestin, and the last part given from a Cambridge book on Subatomic Thermodynamics given by Professor Eric Lifshitz. I also included some material from the 1982 volume, Applied Math for the Phys. Department. The last section of the notes is based on Hugh Brinkley's lecture notes, "Thermodynamic Cooling".

All material by these authors can be used.
