**CMOS Imagers** Orly Yadid-Pecht,Ralph Etienne-Cummings,2007-05-08 The idea of writing a book on CMOS imaging has been brewing for several years It was placed on a fast track after we agreed to organize a tutorial on CMOS sensors for the 2004 IEEE International Symposium on Circuits and Systems ISCAS 2004 This tutorial defined the structure of the book but as first time authors editors we had a lot to learn about the logistics of putting together information from multiple sources Needless to say it was a long road between the tutorial and the book and it took more than a few months to complete We hope that you will find our journey worthwhile and the collated information useful The laboratories of the authors are located at many universities distributed around the world Their unifying theme however is the advancement of knowledge for the development of systems for CMOS imaging and image processing We hope that this book will highlight the ideas that have been pioneered by the authors while providing a roadmap for new practitioners in this field to exploit exciting opportunities to integrate imaging and smartness on a single VLSI chip The potential of these smart imaging systems

is still unfulfilled Hence there is still plenty of research and development to be done      **CCD Image Sensors in Deep-Ultraviolet** Flora Li,Arokia Nathan,2006-01-05 As the deep ultraviolet DUV laser technology continues to mature an increasing number of industrial and manufacturing applications are emerging For example the new generation of semiconductor inspection systems is being pushed to image at increasingly shorter DUV wavelengths to facilitate inspection of deep sub micron features in integrated circuits DUV sensitive charge coupled device CCD cameras are in demand for these applications Although CCD cameras that are responsive at DUV wavelengths are now available their long term stability is still a major concern This book describes the degradation mechanisms and long term performance of CCDs in the DUV along with new results of device performance at these wavelengths
