## **Strategic Positioning Analysis:**

*Essays on Strategy Analysis for Seaports* Elvira Haezendonck, 2001 The increasingly competitive market environment in which port clusters operate today imposes new requirements on port strategy analysis Many port authorities and port operators now realize that a static approach to cost leadership a sole focus on inherited factor advantages and a simplistic reliance on new infrastructure to attract or retain clients are no longer sufficient to guarantee a port's competitive success They need to offer greater value added to port users as well as to society Hence this new market environment forces ports to reconsider their present strategic position and to reflect on the strategic options for the future The book builds upon an in depth survey of economic actors in the Antwerp seaport cluster with a specific focus on the container and conventional cargo clusters It attempts to answer the question why these particular port clusters are more competitive than similar clusters in other ports In order to answer this question the study develops and extends a number of formal tools of strategy analysis that should be useful to both port authorities and port operators

Port Economics Kevin Cullinane, Wayne K Talley, 2006-06-22 A port or seaport is a place that provides for the vessel transfer of cargo and passengers to and from waterways and shores Port economics is concerned with the study of the economics of port services Users of port services are those that utilize the port as part of the transportation process of moving cargo and passengers to and from origin and destination locations Users include transportation carriers such as shipping lines railroads and trucking firms that perform these movements and shippers and individuals that provide the cargo and themselves as passengers to be transported Port users demand port services whereas port service providers such as the port terminal operator supply port services to port users Port economics and shipping economics comprise the branch of economics known as maritime economics This volume provides original contributions to the study of port economics 1 the evolution of port economics 2 economic theories of the port port cost functions and port investment and 3 empirical evidence on the relative efficiency of ports the impact of ports on international maritime transport costs the competitiveness of ports and the impact of deregulation on dockworker wages Provides original contributions to the study of port economics Examines the evolution of port economics economic theories of the port and empirical evidence on the relative efficiency of ports the impact of ports on transport costs and the competitiveness of ports

Chipotle Mexican Grill hereafter referred to as Chipotle is a fast casual restaurant that specializes in a limited menu mainly consisting of burritos tacos and burrito bowls Chipotle is known for its ability to offer products made from sustainable organic ingredients while remaining price competitive with other fast food chains Chipotle refers to this differentiation as food with integrity and it is the driving force that has propelled the company to where it is today Since its foundation in 1993 Chipotle has been tremendously successful growing into a corporation that is now worth roughly 8 5 billion 56 Chipotle s growth is a direct result of the quality of its products the consistency of its service and the perceived differentiated value it has established in the minds of consumers Chipotle stands apart from others in a highly concentrated industry because it does business differently in terms of its food restaurants and advertising While most fast food chains rely on advertisements that promote menu gimmicks such as limited time price reductions new items value menu offerings and more Chipotle focuses on showcasing its quality ingredients It also generates excitement for its food through a number promotional events and word of mouth

Strategic Move Even though the restaurant and bar industry is saturated there are not many competitors that offer organic ingredients within the industry To take advantage of the recent surge of consumers who demand healthier organic food Chipotle has decided to enter into the fast casual Asian restaurant market with a new chain named ShopHouse Southeast Asian Kitchen hereafter referred to as ShopHouse Staying true to its position as a focused differentiator Chipotle will operate ShopHouse under the same philosophy that has made it so s

former market leader fell back to the third place of the industry Analysts of the video game entertainment industry even recommended that Nintendo withdraw completely from the highly competitive console market in order to concentrate on developing software 4 However Nintendo refused to surrender but they were in biggest need to recover market share Nintendo had a very different approach to strategy than Sony or Microsoft Instead of competing for core gamers Nintendo tried to expand the market and to win new cus

Low-cost carrier industry: A focus on Germanwings strategy Volker K pper,2008-05-16 Essay from the year 2007 in the subject Business economics General grade 1 0 Edinburgh Napier University course Economics of Business Strategy language English abstract Since the world s first airline company has been established German Airship Transport Corporation in 1909 especially the new style of low cost airlines increased the competition on the market for commercial flights Towards the end of the century low cost airlines offered first no frills products at a low price The concept originated in the U S before it spread to Europe in the early 1990 s and subsequently to the rest of the world Chan 2000 One main reason for the accelerated increase of low cost flights can be seen in the EU enlargement where open skies arrangements were extended As a result low cost routes were established by existing and new operators The main characteristic of this new strategic orientation was the lower operating cost structure than this of the traditional market participants The traditional airline industry had to face an essential change in the market with an increase of competition and new business models Focusing on Europe there were only a few low cost airlines before the year of 2000 However today about 60 low cost carriers moved mainstream in Europe with a total market share of 24% whereas in Germany 23 low cost airlines operate Berster 2007 To evaluate the specific strategy of Germanwings it is necessary to set limits to the field of study After introducing the company itself the strategic position will be evaluated by focusing on Germany Thus Germanwings will be compared to the operators acting in this country Therefore it is useful to introduce a strategic mapping and the analysis of price practices focusing on Germanwings Furthermore important individual measures of the company will be explained which soften the impact of the above mentioned external influencing factors PEST analysis Finally some up to date measures of the company will conclude its strategic orientation
