Gateways to Understanding Music Timothy Rice, Dave Wilson, 2022-11-14 Gateways to Understanding Music Second Edition explores music in all the categories that constitute contemporary musical experience European classical popular jazz and world music Covering the oldest forms of human music making to the newest this chronology presents music from a global rather than a Eurocentric perspective Each of 60 gateways addresses a particular genre style or period of music Every gateway opens with a guided listening example that unlocks a world of music through careful study of its structural elements How did the piece come to be composed or performed How did it respond to the social and cultural issues at the time and what does that music mean today Students learn to listen to explain understand and ultimately value all the music they encounter in their world New to this edition is a broader selection of musical examples that reflect the values of diversity equity and inclusion advocated by North American universities Eight gateways have been replaced A timeline of gateways helps students see the book's historical narrative at a glance Features Values orientation Diverse equitable and inclusive approach to music history All genres of music Presents all music as worthy of study including classical world popular and jazz Global scope within a historical narrative Begins with small scale forager societies up to the present with a shifting focus from global to European to American influences Recurring themes Aesthetics emotion social life links to culture politics economics and technology Modular framework 60 gateways each with a listening example allow flexibility to organize chronologically or by the seven themes Consistent structure With the same step by step format students learn through repeated practice how to listen and how to think about music Anthology of scores For those courses that use the textbook in a music history sequence Gateways to Understanding Music continues to employ a website to host the audio examples and instructor's resources

The De Gruyter Handbook of Automated Futures Vaike Fors, Martin Berg, Meike Brodersen, 2024-09-23 How does automation affect us our environment and our imaginations What actions should we take in response to automation Beyond grand narratives and technology driven visions of the future what more can automation offer With these questions in mind The De Gruyter Handbook of Automated Futures provides a framework for thinking about and implementing automation differently It consolidates automated futures as an inter and transdisciplinary research field embedding the imaginaries interactions and impacts of automation technology within their social historical societal cultural and political contexts Promoting a critical yet constructive and engaging agenda the handbook invites readers to collaborate with rather than resist automation agendas It does so by pushing the agenda for social science humanities and design beyond merely assessing and evaluating existing technologies Instead the handbook demonstrates how the humanities and social

sciences are essential to the design and governance of sustainable sociotechnical systems Methodologically the handbook is underpinned by a pedagogical approach to staging co learning and co creation of automated futures with rather than simply for people In this way the handbook encourages readers to explore new and alternative modes of research fostering a deeper engagement with the evolving landscape of automation
