Bomber Command Max Hastings:

Bomber Command Max Hastings, 1979 Bomber Command's air offensive against the cities of Nazi Germany was one of the most epic campaigns of World War II. More than 56,000 British and Commonwealth aircrew and 600,000 Germans died in the course of the RAF's attempt to win the war by bombing. The struggle in the air began meekly in 1939 with only a few Whitleys, Hampdens, and Wellingtons flying blindly through the night on their ill-conceived bombing runs. It ended six years later with 1,600 Lancasters, Halifaxes, and Mosquitoes equipped with the best of British wartime technology blazing whole German cities in a single night. Bomber Command, through its fits and starts, grew into an effective fighting force. In *Bomber Command*, originally published to critical acclaim in the UK, famed British military historian Sir Max Hastings offers a captivating analysis of the strategy and decision-making behind one of World War II's most violent episodes. With firsthand descriptions of the experiences of aircrew from 1939 to 1945 based on one hundred interviews with veterans and a harrowing narrative of the experiences of Germans on the ground during the September 1944 bombing of Darmstadt, *Bomber Command* is widely recognized as a classic account of one of the bloodiest campaigns in World War II history. Amazon

Bomber Command Max Hastings, 2010 Max Hastings has traced the developments of area bombing using a wealth of documents, letters, diaries, and interviews with key surviving witnesses. *Bomber Command* lays bare the reality of one of the most controversial struggles of war. *Bomber Command* Max Hastings, 1979 *Bomber Command* Max Hastings, 2021 Bomber Command is journalist and military historian Sir Max Hastings' compelling account of one of the most controversial struggles of the Second World War. RAF Bomber Command's offensive against the cities of Germany was one of the epic campaigns of the Second World War. More than 56,000 British and Commonwealth aircrew and 600,000 Germans died in the course of the RAF's attempt to win the war by bombing. The struggle began in 1939 with a few primitive Whitleys, Hampdens, and Wellingtons and ended six years later with 1,600 Lancasters, Halifaxes, and Mosquitoes razing whole cities in a single night. Max Hastings traced the developments of area bombing using a wealth of documents, letters, diaries, and interviews with key surviving witnesses. *Bomber Command* is in turn a fascinating, meticulously researched, and vivid assessment of the RAF's integral role in the Second World War. **Churchill** Samantha Heywood, 2003 Examining the influential career of Winston Churchill, this new book discusses his career from Secretary of State for War and Air to British Prime Minister during the Second World War and from 1951-55. **Despatch on War Operations, 23rd February, 1942, to 8th May, 1945** Sir Arthur Travers Harris, 1995 This document of historical significance is now available to the general public for the first time.

Recent Themes in Military History Donald A. Yerxa, 2008 Described as the New York Review of Books for history, *Historically Speaking* has emerged as one of the most distinctive historical publications in recent years, actively seeking out contributions from a pantheon of leading voices in historical discourse from both inside and outside academia. *Recent Themes in Military History* represents some of the best writing on military history to appear in the past five years. This collection of

forums interviews and individual essays drawn from *Historically Speaking* provides contrasting views on such topics in military history as the existence and function of military revolutions in the past and present the experience of soldiering and combat the particularly violent and gruesome nature of twentieth century warfare and projections of the nature of future wars The ebb and flow of discourse between contributors also illustrates how the study of history is an ongoing conversation wherein discovery and debate lead to deeper understanding and development of fresh opportunities for further inquiry

The Norton Book of Modern War Paul Fussell,1991 Selections from poetry and fiction describe the 20th century s major conflicts **Churchill's War Lab** Taylor Downing,2011-06-02 This WWII biography of Britain s legendary Prime Minister examines his critical role in the military innovations that led to victory Winston Churchill s vital leadership in the allied victory of World War II is undisputed As a patriot statesman and orator he successfully galvanized a beleaguered nation and helped coordinated a vast international bulwark against fascism Yet of his many unique qualities Churchill s enduring legacy is attributable at least in equal part to his unshakeable fascination for the science of war Churchill s War Lab reveals how Churchill s passion for military history his inimitable leadership style and his dedicated support of radical ideas would lead to new technologies and tactics that would enable an allied victory No war generated more incredible theories technical advances and scientific leaps From the development of radar and the decoding brilliance of Bletchley Park to the study of the D Day beaches and the use of bouncing bombs Churchill s War Lab is an enlightening and exciting new take on Churchill as a complex powerful and inventive war leader *The Destruction of Memory* Robert Bevan,2016-02-15

Crumbled shells of mosques in Iraq the fall of the World Trade Center towers on September 11 when architectural totems such as these are destroyed by conflicts and the ravages of war more than mere buildings are at stake *The Destruction of Memory* now available in this accessible pocket edition reveals the extent to which a nation weds itself to its landscape Robert Bevan argues that such destruction not only shatters a nation s culture and morale but is also a deliberate act of eradicating a culture s memory and ultimately its existence Bevan combs through world history to highlight a range of wars and conflicts in which the destruction of architecture was pivotal From Cortez s razing of Aztec cities to the carpet bombings of Dresden and Tokyo in World War II to the war in the former Yugoslavia *The Destruction of Memory* exposes the cultural war that rages behind architectural annihilation revealing that in this subliminal assault lies the complex aim of exterminating a people He provocatively argues for the fatally intertwined experience of genocide and cultural genocide ultimately proposing the elevation of cultural genocide from collateral damage to a crime punishable by international law

Bombs, Cities, and Civilians Conrad C. Crane,1993 As the might and capabilities of American airpower have grown during the last 60 years so has the controversy about its use in the intentional and indiscriminate wartime bombardment of civilians In *Bombs Cities and Civilians* Conrad Crane maintains that for the most part American airmen in World War II remained committed to precision bombing doctrine Instead of attacking densely populated urban areas simply to erode

civilian morale Army Air Forces adhered to a policy that emphasised targeting key industrial and military sites He demonstrates that while the British Germans and Japanese routinely conducted indiscriminate aerial bombardment of enemy cities American airmen consistently stayed with daylight raids against carefully selected targets especially in Europe Daytime precision missions were usually far more dangerous than night area attacks but such Army Air Forces tactics increased bombing efficiency and also reduced the risk of civilian casualties *The End of the Third Reich* Toby Thacker,2008 In January 1943 President Roosevelt with Churchill alongside him proclaimed that the Allies would fight until Germany surrendered unconditionally This book charts the military defeat of Germany in 1944 and 1945 and explores how the Allies tried after the German surrender to destroy Nazism and all it stood for The Luftwaffe James S. Corum,1997 This study provides an appraisal of Germany's air forces from the post World War I era through the early stages of World War II The author demolishes several myths surrounding the Luftwaffe including the belief that they had no ideas beyond the support of ground forces *How it was in the War* Godfrey Smith,1989 **Battle for the Ruhr** Derek S. Zumbro,2006 A richly detailed epic narrative that gives the perspective of the German officers soldiers and civilians trapped in one of the bloodiest battles toward the end of World War II ultimately leading to the massacre of 350 000 German troops Shows what it looked felt and sounded like for the German troops encircled by the Allied juggernaut in the west as they dealt with Hitler's increasingly surreal commands to stand and fight to the last man *The Spectator* ,1986 *Targeting the Third Reich* Robert S. Ehlers,2009 Argues that air intelligence played a crucial but largely overlooked role in the successful execution of the Allied bombing campaigns against the Third Reich which in turn proved a decisive factor in both ending the war in Europe and ending it as soon as it did **The Economist** ,1979 *On the Offensive* Max Hastings,1995 **BLANKETS OF FIRE** WERRELL KENNETH P,1996-04-17 When the focus of World War II shifted to the Pacific in 1944 the Army Air Forces AAF equipped with the new longer range B 29 bomber tried to shift strategic bombing tactics as well Blankets of Fire describes the adjustments necessary to target Japan and places them in the context of overall AAF and wartime strategy 58 photos
