Glover,2013-12-01 Although the monograph Progress in Optimization I Contributions from Aus tralasia grew from the idea of publishing a proceedings of the Fourth Optimiza tion Day held in July 1997 at the Royal Melbourne Institute of Technology the focus soon changed to a refereed volume in optimization The intention is to publish a similar book annually following each Optimization Day The idea of having an annual Optimization Day was conceived by Barney Glover the first of these Optimization Days was held in 1994 at the University of Ballarat Barney hoped that such a yearly event would bring together the many but widely dispersed researchers in Australia who were publishing in optimization and related areas such as control The first Optimization Day event was followed by similar conferences at The University of New South Wales 1995 The University of Melbourne 1996 the Royal Melbourne Institute of Technology 1997 and The University of Western Australia 1998 The 1999 conference will return to Ballarat University being organized by Barney s long time collaborator Alex Rubinov In recent years the Optimization Day has been held in conjunction with other locally held national or international conferences This has widened the scope of the monograph with contributions not only coming from researchers in Australia and neighboring regions but also from their collaborators in Europe and North America **Optimization and Related Topics** Alexander M. Rubinov,Barney M. Glover,2013-04-17 This volume contains in part a selection of papers presented at the sixth Australian Optimization Day Miniconference Ballarat 16 July 1999 and the Special Sessions on Nonlinear Dynamics and Optimization and Operations Re search Methods and Applications which were held in Melbourne July 11 15 1999 as a part of the Joint Meeting of the American Mathematical Society and Australian Mathematical Society The editors have strived to present both con tributed papers and survey style papers as a more interesting mix for readers Some participants from the meetings mentioned above have responded to this approach by preparing survey and semi survey papers based on presented lectures Contributed paper which contain new and interesting results are also included The fields of the presented papers are very large as demonstrated by the following selection of key words from selected papers in this volume optimal control stochastic optimal control MATLAB economic models implicit constraints Bellman principle Markov process decision making under uncertainty risk aversion dynamic programming optimal value function emergent computation complexity traveling salesman problem signal estimation neural networks time congestion teletraffic gap functions nonsmooth variational inequalities derivative free
