**Descriptive Decision Theory** → How do we actually make decisions? (What factors influence our choices?)

## What is Decision Theory? (Normative Decision Theory)

1. **Identifying the problem** (What is the decision to be made?)
  2. **Identifying the alternatives** (What are the possible choices?)
  3. **Identifying the consequences** (What are the possible outcomes?)
  4. **Identifying the probabilities** (What are the chances of each outcome?)
  5. **Identifying the expected values** (What is the average outcome?)
  6. **Identifying the optimal choice** (Which alternative is the best?)
- Identifying the problem** → What is the decision to be made? (What is the best choice?)
- Identifying the alternatives** → What are the possible choices? (What are the options?)
- Identifying the consequences** → What are the possible outcomes? (What are the results?)
- Identifying the probabilities** → What are the chances of each outcome? (What are the odds?)
- Identifying the expected values** → What is the average outcome? (What is the mean?)
- Identifying the optimal choice** → Which alternative is the best? (Which is the best choice?)
