**Self-Serving Public Leadership and Governance** Obinna Ubani-Ebere,2022-12-19 Leadership matters in everything Shared humanity is at risk of paralysis if the society lacks trustable transparent and accountable leadership for the well being of the society A nation is nothing but a perishable commodity if it lacks leadership foresight or vision and continually stands on a blind spot of political social and economic development Government is an asset if it has utility or values that impact citizens positively and improve their well being or livelihood In contrast the government is a total liability or lacks utility or values if its actions impede unity progress and development or undermine citizens well being Greed is the common denominator of public corruption Moreover corruption is a consequence of self serving leadership and governance in African countries demolishing hopes aspirations and ingenuity Thus public corruption in African countries is the great conspiracy against innocent and poor citizens by the politicians elites and religious aristocrats causing obstacles to development Consequently there is a high possibility of political economic and social failures or marginalization of the poor when a nation s political governance is besieged by sit tight leadership syndrome self serving leaders greedy mindsets and corrupt leaders Here are the two critical questions Can African countries escape paralysis meltdowns or extreme poverty if the government is controlled by self serving public leaders who focus on themselves while ignoring the challenges of the larger society Can African countries survive the mediocrity of governance and frequent devastations due to the menace of religion tribalism and corruption in government public leadership and governance *Contemporary Governance Challenges in the Horn of Africa* Charles Manga Fombad,Assefa Fiseha,Nico Steytler,2022-09-06 This book argues that a leading cause of the political instability in the Horn of Africa is a crisis of governance caused by extreme centralization of power weak institutions and the failure to institutionalise the responsible use of authority In recent years many attempts have been made to resolve the ongoing conflicts in Somalia and South Sudan but problems remain and in 2019 the instability spread to Ethiopia This book critically examines how many of the governance problems in the region can be addressed through institutional design The central argument is that an inclusive system of governance through federalism devolution and inclusive political institutions as well as ensuring the institutionalization of power through strengthening the rule of law has the potential to make governments more accountable inclusive and be able to deliver critical services Such systems ensure relative stability and peace and reduce the risks of state fragmentation a major concern in the region Demonstrating that the threats of further fragmentation and conflict due to the crisis of governance are likely to continue unless serious steps are taken to deal with the situation the book will be an important read for researchers and policy makers with an interest in peacemaking politics constitutional law and federalism in the region **Climate Governance in International and Comparative Perspective** Peter F. **Government Handbook** Uganda, Leadership for Development Dennis A. Rondinelli, John M. Heffron, 2009 Although the extraordinary leadership that stimulated European recovery efforts in the late 1940s and early 1950s is now widely celebrated as a model for international development assistance the role of leadership in development is too often taken for granted Rondinelli and Heffron argue persuasively that leadership is the hallmark of almost every successful effort at international development since the late 1940s and that its absence is the underlying cause of most development failures Leadership for Development examines fundamental issues the tools leaders use to achieve development goals how culture and interdependence among governments and organizations affects leadership styles where leaders get their advice from experts non experts academic or non academic elites and if it matters whether transformational or transactional leadership styles are more effective and the lessons that can be drawn from examining the traits of successful leaders Focusing largely on the Pacific Basin region and Latin America the book offers valuable case studies for development practitioners looking to increase their effectiveness in a highly interdependent global society
