*World Englishes and Second Language Acquisition* Michael Percillier, 2016-09-07 Bridging the gap between the fields of World Englishes and Second Language Acquisition, this volume offers an in-depth comparative analysis of two postcolonial varieties of English: Singapore and Malaysian English and neighbouring Indonesian learner English, in order to examine the Outer Expanding Circle distinction and shed light on the genesis of postcolonial varieties of English. The study identifies and analyses more than thirty linguistic features in the categories phonology, morphology, syntax and discourse, concluding that in spite of clear syntactic differences the distinction between the Outer and Expanding Circles is gradual rather than strictly categorical and should rely on current sociolinguistic realities rather than on historical criteria. The volume will be highly relevant for researchers interested in the dynamics of Outer Circle and Expanding Circle Englishes, the structural and sociolinguistic aspects of English in Southeast Asia or the integration of the paradigms of World Englishes and Second Language Acquisition. World Englishes and Second Language Acquisition received honourable mention at the 2018 ESSE Book Awards.

**How to Use Corpora in Language Teaching** John McHardy Sinclair, 2004-01-01 After decades of being overlooked, corpus evidence is becoming an important component of the teaching and learning of languages. Above all, the profession needs guidance in the practicalities of using corpora: interpreting the results and applying them to the problems and opportunities of the classroom. This book is intensely practical, written mainly by a new generation of language teachers who are acknowledged experts in central aspects of the discipline. It offers advice on what to do in the classroom, how to cope with teachers' queries about language, what corpora to use (including learner corpora and spoken corpora) and how to handle the variability of language. It reports on some current research and explains how the access software is constructed, including an opportunity for the practitioner to write small but useful programs, and it takes a look into the future of corpora in language teaching.

*Metaphors in Learner English* Susan Nacey, 2013-11-15 This volume presents results from a corpus-based investigation into the metaphorical production of foreign language learners, comparing texts written by Norwegian L2 learners of English with those written by British L1 students. Three types of questions are addressed: The first has empirically measured answers. For example, do L2 English writers produce more metaphors than L1 novice writers? How frequent are novel metaphors in an L2 as compared with an L1? The

second type has more subjective answers How creatively do L2 English learners employ metaphor Are they even expected to be able to produce metaphor at all The third type combines theoretical and methodological perspectives How is metaphorical creativity identified What is the potential role of metaphoric competence Most importantly how are metaphors identified To this end the newly developed Metaphor Identification Procedure is tested and critiqued This book is intended for metaphor researchers corpus linguists applied linguists and language educators [The Massachusetts Register](#) ,2017-07-28
