**Locomotives—British Railways Class 17** Anthony P. Sayer,2021-05-30 This informative illustrated guide to the British Railways locomotive series covers its full production lifespan from 1962 1965 In the early 1960s the Bo Bo diesel electric locomotive known as The Clayton was conceived as the new standard for British Railways superseding other Type 1 classes While the early classes suffered from poor driver visibility the Claytons were highly successful and popular with operating crews However the largely untested high speed flat Paxman engines proved to be highly problematic As a result the Claytons were eventually withdrawn from BR service by December 1971 Anthony Sayer draws on considerable amounts of archive

material to tell the full story of these Standard Type 1 locomotives and the issues surrounding their rise and fall Further sources provide insights into the effort and money expended on the Claytons in a desperate attempt to improve their reliability Supported by over 280 photographs and diagrams dramatic new insights into this troubled class have been assembled for both historians and modelers alike **The Far-Eastern Review** ,1923 *The Railway Engineer* ,1915

English Electric Type 2 Bo-Bo 'Baby Deltic' Locomotives Anthony P Sayer,2025-03-30 The British Railways Pilot Scheme orders of 1955 included ten English Electric Type 2 diesel electric locomotives deploying Napier Deltic engines These locomotives more colloquially known as the Baby Deltics were introduced into traffic during 1959 for use on the Eastern Region of British Railways This book looks at the history of the Class 23s making extensive use of available but previously unpublished archive material covering their introduction technical idiosyncrasies appearance design and performance Issues with the original Deltic engines were ultimately dealt with via a major rehabilitation exercise during the 1963 65 period whilst various re engining options were considered including a new U series English Electric high speed engine design the original Napier engines were ultimately retained The work involved in the whole rehabilitation process is discussed in detail using internal English Electric archive material and forms a central focus of research The fleet survived intact until 1968 when withdrawal commenced as a direct result of declining traffic levels across the UK with successive National Traction Plans progressively selecting the less successful non standard and numerically challenged classes for removal from traffic All ten locomotives were withdrawn by March 1971 Individual locomotive histories allocations fire and accident incidents liveries and detail differences storage and disposals are provided for each locomotive **The Far Eastern Review, Engineering, Finance, Commerce** ,1923 **Locomotive, Railway Carriage and Wagon Review** ,1914 *The Oil Engine and Gas Turbine* ,1960 **The Journal of the Institution of Locomotive Engineers** Institution of Locomotive Engineers (Great Britain),1963 **Great Britain and the East** ,1928 *The Engineer* ,1919 **Beama Journal** ,1951 **Locomotive Magazine and Railway Carriage and Wagon Review** ,1915 *Railway Engineer* ,1976 **The B T H and North British Type 1 Bo-Bo Diesel-Electric Locomotives - British Railways Classes 15 and 16** Anthony P. Sayer,2021-12-30 The British Railways Pilot Scheme orders of 1955 included ten BTH and ten NBL Type 1 locomotives these being introduced during 1957 61 for use in East London and on the Great Eastern and London Tilbury Southend lines The BTH fleet subsequently expanded to forty four as a consequence of their light axle loading and the availability of spare manufacturing capacity which BR chose to exploit in their quest to eliminate steam traction Further construction of these two classes ceased after the fifty four units with preference being given to the highly reliable English Electric product which by mid 1962 had proliferated to 128 examples The NBL fleet survived until 1968 being withdrawn after ten years of indifferent performance The BTH locomotives followed by 1971 although four lingered on as carriage pre heating units Dramatic reductions in goods traffic during the 1960s 70s particularly impacted local trip and transfer freight duties the

bread and butter work for the Type 1s and it was inevitable that the less successful classes were retired from traffic first This book looks at the short history of these two classes making extensive use of archive sources combined with the primary observations of numerous enthusiasts Previously unpublished information covering the introduction appearance design and performance issues of the locomotives form a central focus and allocations works histories storage and disposals liveries and detail differences are covered in the same level of detail as previous volumes in the Locomotive Portfolio series *Railway Directory & Year Book* ,1979 **Proceedings** ,1960
