**Futureproof: A comprehensive framework for teaching digital citizenship in schools** Gianfranco Polizzi, Lee Peachey, Sophie Murfin, Tom Harrison, 2022-06-07 Futureproof shows school leaders and teachers how they can educate for digital citizenship through the adoption of a new comprehensive and coherent framework. The book addresses a gap as there are currently no well-known frameworks that provide a comprehensive approach to teaching digital citizenship education in UK schools. This is surprising given how digital technologies are part and parcel of most young people's lives today and will continue to be so in the future. Given that the technologies are constantly changing, it might be said that those responsible for teaching digital citizenship are shooting in the dark whilst trying to hit a moving target. The book brings clarity by explaining the theory and research behind the Futureproof framework and through its focus on how it can be implemented in primary and secondary schools. The book includes details of the digital citizenship framework, an overview of learning and teaching outcomes, and examples from practice throughout.

**Digital Skills and Life-long Learning: Digital Learning as a New Insight of Enhanced Learning by the Innovative Approach Joining Technology and Cognition** Dina Di Giacomo, Pierpaolo Vittorini, Pilar Lacasa, 2019-03-01 Recently, technology and aging have been key research areas in human cognition. The Research Topic "Digital Skills and Life-long Learning: Digital Learning as a New Insight of Enhanced Learning by the Innovative Approach Joining Technology and Cognition" investigated technology's impact on cognitive and intellectual processes, highlighting how intensively technology can change and/or enhance cognitive functioning throughout one's lifespan. The aim of this Research Topic was to provide an outlook through multidisciplinary research and development while addressing the dynamic intersection of cognition, mind, and technology. Our scope was 1) to favor the cognitive technology debate; 2) to overcome the dichotomies of technology and psychology; 3) to emphasize the advances in knowledge and well-being. This Research Topic comprises review studies and original articles focused on digital skills that enhance human potential. Transversal approaches and cross-sectorial analysis were encouraged, leading to investigation areas related to cognitive and mental processing in educational, rehabilitation, clinical settings, across aging. Articles of high relevance to the Research Topic were submitted on the subjects of a research in human performance and human factors; b) new research and technologies addressing the needs of a growing populace; and c)
