Exercises and Solutions in Biostatistical Theory Lawrence Kupper, Brian Neelon, Sean M. O'Brien, 2010-11-09 Drawn from nearly four decades of Lawrence L Kupper's teaching experiences as a distinguished professor in the Department of Biostatistics at the University of North Carolina Exercises and Solutions in Biostatistical Theory presents theoretical statistical concepts numerous exercises and detailed solutions that span topics from basic probability to statistical inference The text links theoretical biostatistical principles to real world situations including some of the authors own biostatistical work that has addressed complicated design and analysis issues in the health sciences This classroom tested material is arranged sequentially starting with a chapter on basic probability theory followed by chapters on univariate distribution theory and multivariate distribution theory The last two chapters on statistical inference cover estimation theory and hypothesis testing theory Each chapter begins with an in depth introduction that summarizes the biostatistical principles needed to help solve the exercises Exercises range in level of difficulty from fairly basic to more challenging identified with asterisks By working through the exercises and detailed solutions in this book students will develop a deep understanding of the principles of biostatistical theory The text shows how the biostatistical theory is effectively used to address important biostatistical issues in a variety of real world settings Mastering the theoretical biostatistical principles described in the book will prepare students for successful study of higher level statistical theory and will help them become better biostatisticians

Applied Linear Regression Models John Neter, William Wasserman, Michael H. Kutner, 1989 Applied Linear Regression Models was listed in the newsletter of the Decision Sciences Institute as a classic in its field and a text that should be on every member's shelf The third edition continues this tradition It is a successful blend of theory and application The authors have taken an applied approach and emphasize understanding concepts this text demonstrates their approach through worked out examples Sufficient theory is provided so that applications of regression analysis can be carried out with understanding John Neter is past president of the Decision Science Institute and Michael Kutner is a top statistician in the health and life sciences area Applied Linear Regression Models should be sold into the one term course that focuses on regression models and applications This is likely to be required for undergraduate and graduate students majoring in allied health business economics and life sciences
