for increased inclusiveness and employability It includes several case studies from Turkey in which the private sector has created significant added value through private sector led or PPP models of skills design and delivery It elaborates on the lessons learned from these cases to pave the way for further action and research on how business actors can contribute to skills development especially for the disadvantaged The publication will lead to further research products and reports and eventually toolkits on how to mobilize and engage the private sector in skills generation for better development results Workshops will be organized for the private sector governments and other relevant stakeholders based on these toolkits to facilitate knowledge sharing and encourage innovation "In Search of ..." This book, designed as a qualitative case study with a strong descriptive component, provides answers to these questions. It highlights the importance of the domestic political landscape for the ultimate fate of the reforms and the role of influential individuals in the process.
