

Chapter 14 The Human Genome

Section 14–1 Human Heredity (pages 341–348)

TEKS FOCUS: 6A Information for traits in DNA; 6D Genetic variation; 6F Identify and analyze karyotypes

This section explains what scientists know about human chromosomes, as well as the inheritance of certain human traits and disorders. It also describes how scientists study the inheritance of human traits.

Human Chromosomes (pages 341–342)

1. How do biologists make a karyotype? _____

2. Circle the letter of each sentence that is true about human chromosomes.

- A The X and Y chromosomes are known as sex chromosomes because they determine an individual's sex.
- B Males have two X chromosomes.
- C Autosomes are all the chromosomes, except the sex chromosomes.
- D Biologists would write 46,XY to indicate a human female.

3. Complete the Punnett square below to show how the sex chromosomes segregate during meiosis.

4. Why is there the chance that half of the zygotes will be 46,XX and half will be 46,XY?

"Art, Sex and Eugenics " Anthea Callen, 2017-07-05 This book reveals how art and sex promoted the desire for the genetically perfect body Its eight chapters demonstrate that before eugenics was stigmatized by the Holocaust and Western histories were sanitized of its prevalence a vast array of Western politicians physicians eugenic societies family leagues health associations laboratories and museums advocated through verbal and visual cultures the breeding of the master race Each chapter illustrates the uncanny resemblances between models of sexual management and the perfect eugenic body in America Britain France Communist Russia and Nazi Germany both before and after the Second World War Traced back to the eighteenth century anatomy lesson the perfect eugenic body is revealed as athletic hygienic pure blooded and sexually potent This paradigm is shown to have persisted as much during the Bolshevik sexual revolution as in democratic nations and fascist regimes Consistently posed naked these images were unashamedly exhibitionist and voyeuristic Despite stringent legislation against obscenity not only were these images commended for soliciting the spectator's gaze but also for motivating the spectator to act out their desire An examination of the counter archives of Maori and African Americans also exposes how biologically racist eugenics could be equally challenged by art Ultimately this book establishes that art inculcated procreative sex with the *Corpus Delecti* the delectable body healthy wholesome and sanctioned by eugenicists for improving the Western race **A Culture of Improvement** Robert Friedel, 2010-02-26 How technological change in the West has been driven by the pursuit of improvement a history of technology from plows and printing presses to penicillin the atomic bomb and the computer Why does technology change over time how does it change and what difference does it make In this sweeping ambitious look at a thousand years of Western experience Robert Friedel argues that technological change comes largely through the pursuit of improvement the deep rooted belief that things could be done in a better way What

Friedel calls the culture of improvement is manifested every day in the ways people carry out their tasks in life from tilling fields and raising children to waging war Improvements can be ephemeral or lasting and one person s improvement may not always be viewed as such by others Friedel stresses the social processes by which we define what improvements are and decide which improvements will last and which will not These processes he emphasizes have created both winners and losers in history Friedel presents a series of narratives of Western technology that begin in the eleventh century and stretch into the twenty first Familiar figures from the history of invention are joined by others the Italian preacher who described the first eyeglasses the dairywomen displaced from their control over cheesemaking and the little known engineer who first suggested a grand tower to Gustav Eiffel Friedel traces technology from the plow and the printing press to the internal combustion engine the transistor and the space shuttle Friedel also reminds us that faith in improvement can sometimes have horrific consequences as improved weaponry makes warfare ever more deadly and the drive for improving human beings can lead to eugenics and even genocide The most comprehensive attempt to tell the story of Western technology in many years engagingly written and lavishly illustrated *A Culture of Improvement* documents the ways in which the drive for improvement has shaped our modern world *American Men of Science* ,1949 Journal of Biological Education ,1981 Agricultural Index ,1919 **Biological & Agricultural Index** ,1919 **Modules** McDougal Littell Incorporated,2005 **A New Commentary on Holy Scripture** Charles Gore, Henry Leighton Goudge, Alfred Guillaume,1928 The New Student Amy S.
