

American Politics Chapter 1

Politics is the study of who gets what when, where, why, and how

Why? (The purpose of it all) = Power.

Authority:

- Power that is defined as legitimate
- Government can harness legitimacy (They use it to do things we wouldn't allow anyone to do)
- This is brief, but also done through force
 - When events shake that legitimacy, that's where you'll see change
 - Protests result in major social shifts

Democracy is incredibly fragile

- The Stories we tell ourselves
- We make sense of society in a series of stories
- Who is good/bad, what is legitimate/wrong
- Those stories reinforce some narratives over others, shape power, makes it seem obvious and unquestioning
 - Gatekeeping
- We don't have the same ability to set narratives
- Some have been more durable over time

Institutional Rules Matter

- When you choose the game, you do well in it
- Institutions in the US were not set up by all of us
 - It is harder for some people (groups) to interact/engage with those institutions
 - If an institution works well for you- it can be hard to see it not working

Power at the beginning-> power at the present

Politics and Economics

Economics also deals with distributional outcomes

-Material resources and services

Our focus is primarily on power

How to Use Politicians to Get What You Want Scott Colvin, 2011-04-20 Ever since the 2009 expenses scandal erupted public opinion towards politicians has hit rock bottom Even with a new intake into Parliament people are still asking what is the point of having an MP However people do not realise that politicians can be used to help them get what they want in a range of situations in everyday life Scott Colvin has spent the past ten years working in national and local politics During that time he has worked out how to use politicians to win a range of personal battles both as a consumer and in his community All the battles he has won including getting the chief executive of a FTSE 25 company to personally intervene to send an engineer to his home saving the last post office in his town campaigning for his child s nursery to remain open and getting a wheel clamp to remove a clamp free of charge he has done by using MPs and councillors either passively or actively to support his campaigns He believes that everyone could do the same if only they knew how This book is an informal how to guide for consumers pressure groups residents groups etc to demonstrate how and when to use your national and local politicians to assert your rights as both a consumer and a citizen Politicians are often seen to have played the system for their own financial and personal gain it is time for the people they represent to get the same chance **American Government**

Injustice Clive Barnett,2017-11-01 This original and ambitious work looks anew at a series of intellectual debates about the meaning of democracy Clive Barnett engages with key thinkers in various traditions of democratic theory and demonstrates the importance of a geographical imagination in interpreting contemporary political change Debates about radical democracy Barnett argues have become trapped around a set of oppositions between deliberative and agonistic theories contrasting thinkers who promote the possibility of rational agreement and those who seek to unmask the role of power or violence or difference in shaping human affairs While these debates are often framed in terms of consensus versus contestation Barnett unpacks the assumptions about space and time that underlie different understandings of the sources of political conflict and shows how these differences reflect deeper philosophical commitments to theories of creative action or revived ontologies of the political Rather than developing ideal theories of democracy or models of proper politics he argues that attention should turn toward the practices of claims making through which political movements express experiences of injustice and make demands for recognition redress and re pair By rethinking the spatial grammar of discussions of public space democratic inclusion and globalization Barnett develops a conceptual framework for analyzing the crucial roles played by geographical processes in generating and processing contentious politics **Organizational Behavior** John R. Schermerhorn,1997-03
Sins Against Science Judi Nath,2021-11-22 Misinformation has had dramatic and dangerous effects as evidenced by numerous events of the late 2010s and early 2020s Reading a steady stream of misinformation leads to distrust potentially leading to conflict in one s family and workplace and even to civil unrest At the heart of many such matters is scientific illiteracy Many people enjoy a life of ease and convenience because of science and since science also crosses courtrooms classrooms and cultures it has great potential to debunk misinformation and untangle the confusion on such issues as vaccines sexual identity race and evolution alternative medicine and human reproduction This book addresses those issues and the popular stories conspiracies and misleading headlines that circulate across media platforms Bringing accurate knowledge into people s agendas is challenging and this book uses science and facts as a basis of every deliberation over laws and policies The chapters weave together history politics human biology and law and demonstrate how our lives are dependent on understanding the nature of things **Governing Babel** John P. Wihbey,2025-10-07 Why social media platforms have a responsibility to look after their platforms how they can achieve the transparency needed and what they should do when harms arise The large corporate global platforms networking the world s publics now host most of the world s information and communication Much has been written about social media platforms and many have argued for platform

accountability responsibility and transparency But relatively few works have tried to place platform dynamics and challenges in the context of history especially with an eye toward sensibly regulating these communications technologies In *Governing Babel* John Wihbey articulates a point of view in the ongoing high stakes debate over social media platforms and free speech about how these companies ought to manage their tremendous power Wihbey takes readers on a journey into the high pressure and controversial world of social media content moderation looking at issues through relevant cultural legal historical and global lenses The book addresses a vast challenge how to create new rules to deal with the ills of our communications and media systems but the central argument it develops is relatively simple The idea is that those who create and manage systems for communications hosting user generated content have both a responsibility to look after their platforms and have a duty to respond to problems They must in effect adopt a central response principle that allows their platforms to take reasonable action when potential harms present themselves And finally they should be judged and subject to sanction according to the good faith and persistence of their efforts

Issues in EU and US Foreign Policy Münevver Cebeci,2011-01-06 *Issues in E U and U S Foreign Policy* edited by M nevver Cebeci aims at analyzing the perceptions interests and policies of the EU and the US on various international issues It portrays their convergences and divergences and reflects on their interplay The book has a geographical focus rather than a thematic one however some themes such as weapons of mass destruction dual use technology transfer energy security and democratization are unavoidable within their respective geographical contexts For example the authors inquire into the case of Iran with a special focus on nuclear proliferation they investigate Russia with a significant emphasis on energy security Iraq is examined with a discussion on the withdrawal of occupation troops and finally the authors address the case of China with a debate on dual use technology transfer *Issues in European Union and U S Foreign Policy* is composed of two parts The first involves an inventive theoretical framework for understanding EU and US foreign policy The analysis extends beyond traditional approaches that seek to explain US and EU foreign policy through various dichotomies such as soft power versus hard power without overlooking the significance of such dichotomies This section further discusses how European and American scholars approach transatlantic relations in different ways The second section covers an intensive comparative analysis of EU and US foreign policy on specific issue areas Some chapters also deal with the impact of their policy divergences and convergences on transatlantic relations and NATO Nevertheless the book aims to go beyond the parochial debates of burden sharing or division of labor in transatlantic relations It focuses on and actually proposes a broader framework of cooperation and coordination for the EU and the US

Im-Your Gde Coll Succ Santrock,2003-05 **A Fundamental Mistake** Graham Cliff,2012-06-01 Does it puzzle you that despite ever increasing rules controls and counter measures antisocial behaviour is seemingly spiralling out of control Why have there been riots in Britain Why is law enforcement failing to make our society a better place in which to live Have our politicians lost the plot Are our values wrong *A Fundamental Mistake* explains why a change of direction is

needed in society's thinking about how to get people to behave themselves it also offers a carefully argued strategy by which to achieve this. The emphasis needs to shift away from coercion and punishment and towards inducement and reward. The remarkable thing is that although we already have the necessary knowledge it's not put to good use. Taking a fresh approach Graham Cliff draws on mainstream behavioural psychology and applied ethics to make his case for challenging some of our time-honoured cultural assumptions and practices. Be prepared to re-think your position. Despite the weightiness of the subject this is a book for everyone because it works up from first principles in a readily readable way. No expertise is needed to follow the flow from the basics of human nature to the way our minds work then through the web of customs and rules that make up society on to government laws and punishment and finally to how and why things might be done differently. Nobody will agree with everything that *A Fundamental Mistake* has to say because that's what debate is all about. However it's as well to remember this when it comes to tackling antisocial behaviour it's not enough just to get tough we must get clever too.

Truth Seeker, 1895 **Power** Dennis Toombs, 2016 A political scientist examines the uses and abuses of power from the interpersonal level to the powerful social and economic influences of organizations governments nations and the global marketplace **Book Review Digest**, 1913 **Primitive Methodist**, 1896
