Balancing Job Satisfaction and Performance Willa M. Bruce,J. Walton Blackburn,1992-11-18 Work provides daily meaning as well as daily bread according to Studs Terkel Yet work is not always a place where one feels satisfied In order to attract and retain qualified employees in the up coming tight labor market companies will have to recognize that people are their most important asset Using original research this book describes what employees want and need from their working environment to maximize their satisfaction and their performance It assists the reader to deal with employees as unique individuals whose personal needs for self actualization can be integrated with organizational performance needs The book begins with a summary of the conventional wisdom on job satisfaction and performance and a description of what constitutes good work Bruce and Blackburn introduce their readers to the workplace complexities created by cultural diversity mature workers and women employees They explain the effect of culture on behavior and why the traditional means to foster job satisfaction and performance are necessary but insufficient for

managing diversity They give advice on how to meet the challenges presented by changing environmental and technological trends They teach how to manage when family demands on both men and women spill over onto the organization and they describe the emerging conviction that for many those in a work setting are family for one another They provide specific instructions for conducting and utilizing training programs In the belief that people accept what they help to create they explain the utility of participation at different organizational levels and some different approaches to participative planning and decision making including Total Quality Management They report on interviews with employees from a cross section of jobs in different organizations to assist the reader to understand how employees perceive the reality of work and they provide appendices containing training outlines guidelines for preventing and addressing sexual harassment complaints and forms to utilize in organizing a participative planning process Breir book is an important resource for managers executives consultants and students who seek to understand how the changing nature of the workforce is affecting job satisfaction and performance and who want to act on behalf of their organization and their employees It is useful for managers in the private sector as well as those who work for government and not for profit organizations

Perspectives and Opinions in Health Services, volume II Andrea Cioffi, Daniel Ślęzak, Farshid Alaeddini, 2026-02-06 This Research Topic includes high quality Perspective articles and Opinion articles published in Frontiers in Health Services in 2023 We invite researchers to submit their perspectives and opinions regarding the effectiveness delivery or efficiency of health services to ultimately contribute to helping health systems improve both experiences and outcomes of patients and make health systems more equitable and sustainable We welcome contributions on a range of topics including but not limited to Improving equitable access to health services for all Novel perspectives on implementation and scaling up effective health services Advances in theoretical contributions or theory refinement Proposed hypotheses to better articulate complex challenges in health systems or service delivery Cost effectiveness value in health Ethical perspectives relating to resource allocation Healthcare management for health workers and patients Patient and family experience and perspectives on patient safety Patient and citizen advocacy and involvement within healthcare Organization of the health workforce Perspective articles aim to present a viewpoint on a specific area within health services The articles in this collection may discuss current advances and future directions and clearly present the author s perspective Perspective articles should also provide an accurate presentation and citations of other authors work and may include original data as well as personal insights and opinions Opinion articles allow authors to contribute viewpoints on the interpretation of recent findings in health services the value of the methods used as well as the weaknesses and strengths of scientific hypotheses They should be supported by evidence and fully referenced The goal is to encourage constructive discussion and refrain from emotionally charged argumentation Finally Opinion articles must not contain unpublished or original data Please note that other article types such as original research and reviews are out of the scope of this Research Topic and will be removed

Emotional Resilience for Wellbeing and Employability: The

Role of Learning and Training Svajone Bekesiene, Sarka Hoskova-Mayerova, Rasa Smaliukiene, 2024-03-08 Today

emotional resilience is one of the most important competencies in the process of young people's transition to adult life and developing a meaningful career. Emotional resilience is also important for maintaining well-being after stressful events throughout life. During the COVID-19 pandemic, many studies have shown the negative impact of perceived stress on people's well-being, careers, and even their employability. At the same time, emotional resilience is important in everyday life as it protects against mental disturbances. Emotional resilience is a competence that can be developed under formal educational programs or trained using a range of training methods and tools. Emotional resilience is a trait people have from birth and develop throughout their lives. It is a trainable capability that can be used to display positive adaptation to stressful situations and cope with life's challenges.

Predicting Employees' Work Exhaustion, Job

Satisfaction, and Turnover Intention: The Role of Informed Job Resources and Personal Resources Jignya M.

Patel, 2015. Turnover intention of information technology (IT) professionals and IT users has been a topic of interest to both academics and industry in recent years. Job demands such as excessive workload, work exhaustion, relentless deadlines, role conflict, and role ambiguity have all been found to affect turnover intention of IT professionals and IT users. Yet researchers have paid little attention to the influence of job resources and personal resources. The purpose of this research, presented in the form of two essays, is to explore the effect of those influences on turnover intention of IT professionals and IT users. Using job demand resource theory, the first essay presents a holistic model that integrates job and IT demands and resources of an informed job. We test the influence of these demands and resources on work exhaustion, job satisfaction, and turnover intention of employees in a relatively recent informed industry, i.e., truck drivers. We find that demands of an informed job increase stress, resulting in work exhaustion. However, we also find that resources of an informed job, including IT resources, reduce the influence of work exhaustion and increase job satisfaction. Recommendations for job design to improve employee well-being and improve job retention are offered based on the study results. Using identity theory, the second essay examines the effect of personal resources, i.e., role identity, team identity, and organizational identity, on software development professionals' job satisfaction and turnover intention. Identity is a form of personal resource that individuals bring into their role performance as a professional in their area of expertise, role identity as a member of a team, team identity, and as a loyal employee of the organization, organizational identity. Using data from 192 software development professionals, the results of the study show that developers who identified highly with their role experienced greater job satisfaction but were also more likely to quit their organization. Contrary to our expectations, developers' team identity did not affect either their job satisfaction or turnover intention.

Effects of Cyber Incivility on Stress and Work Life Balance in the BPO Industry

Kathleen Ballon, Jan Benedict Andres, Danica Ashley Bautista, 2018-05-11 Research Paper undergraduate from the year 2018 in the subject Leadership and Human Resources Occupational burnout and stress at work grade 88 16 University of Santo Tomas course BS in Commerce and Business Administration major in Human Resource Development Management language English abstract The study aims to determine the effects of cyber incivility on employee work stress and turnover intent in the company A total of 385 rank and file employees in the BPO industry aged 18 55 years old were requested to answer a 4 part questionnaire covering 4 constructs Data gathered were processed through SPSS for Windows version 20 and AMOS version 24 SEM surprisingly resulted to an emerging model which deviated from the hypothesized model and particular influences of some constructs to the underlying dimensions of the other constructs The results of the study raises awareness among the Human Resource practitioners regarding how cyber incivility affects BPO employees level of work stress and how committed they are to their organizations Recommendations were made by the researchers which may help the management to develop projects and programs that will lessen turnover intent
