Astronomy on the Personal Computer Oliver Montenbruck, Thomas Pfleger, 1994 It is said that a typical astronomer of the 19th century spent seven hours working at a desk for every hour spent at the telescope That s how long the routine analysis of data took with pencil paper and logarithmic tables Thus when Wilhelm Olbers discovered the minor planet Vesta in 1807 and gathered the necessary observations his friend Gauss needed almost 10 hours to hand calculate its orbit That achievement astonished many less gifted astronomers of the time who might have labored days to work out the orbit of a newfound comet How different things are today Gauss s method of orbit determination presented in Chap 11 of this book runs to completion on a home computer in a few seconds at most The machine will issue its accurate results in less time than it takes to key in the observations In this book a landmark in the youthfulliterature of astronomical computer algorithms Oliver Montenbruck and Thomas Pfleger cover many topics of keen interest to the practical observer For me its most remarkable feature is the library of interrelated program modules all elegantly written in PASCAL Anyone who has tried to create such modules in interpreted BASIC soon runs into trouble too few letters for variable names not enough significant digits and so on These PASCAL routines are invoked one after another in coordinate transformations and calendar conversions *Astronomie mit dem Personal Computer* Oliver Montenbruck, Thomas Pfleger, 2013-03-14 *Astronomie mit dem Personal Computer* stellt einem weiten Interessentenkreis vom engagierten Hobbybeobachter über den Studenten bis zum Dozenten leistungsfähige gut strukturierte Pascal Programme zur Verfügung Sie reichen von der Berechnung von

Koordinatentransformationen oder genauen Planetenpositionen bis zur Vorhersage von Sternbedeckungen und Sonnenfinsternissen oder der Bahnbestimmung und der Photoplattenvermessung Dazu werden das Problem die numerische Lösung und das Programm ausführlich vorgestellt und die Ergebnisse diskutiert Der modulare Aufbau der auf Diskette erhaltenen Pascal Programme Bestellkarte liegt bei macht diese vielfältig einsetzbar und erlaubt es damit weitere Software zur Lösung eigener Aufgaben zu entwickeln

Astronomy with your Personal Computer Peter Duffett-Smith,1990-06-29 The first edition of this very successful book was a winner of the Astronomical Society of the Pacific's Astronomy Book of the Year award in 1986 The popularity of the book's programs is based on the ease with which the amateur astronomer can perform calculations on a personal computer The routines are not specific to any make of computer and are user oriented in that they utilize a simple version of the BASIC programming language and require only a broad understanding of any particular problem Seven new subroutines in this new edition can be linked in any combination with the existing twenty six Since the programs themselves take care of details they can be used for example to calculate the time of rising of any of the planets in any part of the world at any time in the future or past or they may be used to find the circumference of the next solar eclipse visible from a particular place In fact almost every problem likely to be encountered by the amateur astronomer can be solved by a suitable combination of the routines given in this book Peter Duffett Smith is the author of another popular astronomy book *Astronomy with Your Calculator* 3rd Edition also published by Cambridge University Press

Astronomy with a Home Computer Neale Monks,2006-03-30 Here is a one volume guide to just about everything computer related for amateur astronomers Today's amateur astronomy is inextricably linked to personal computers Computer controlled go to telescopes are inexpensive CCD and webcam imaging make intensive use of the technology for capturing and processing images Planetarium software provides information and an easy interface for telescopes The Internet offers links to other astronomers information and software The list goes on and on Find out here how to choose the best planetarium program are commercial versions really better than freeware Learn how to optimise a go to telescope or connect it to a lap top Discover how to choose the best webcam and use it with your telescope Create a mosaic of the Moon or high resolution images of the planets *Astronomy with a Home Computer* is designed for every amateur astronomer who owns a home computer whether it is running Microsoft Windows Mac OS or Linux It doesn't matter what kind of telescope you own either a small refractor is just as useful as a big go to SCT for most of the projects in this book

Corwin, Lucette Bottinelli, 1991 From 12 April to 14 April 1988 120 of Gerard and Antoinette de Vaucouleurs's friends and colleagues gathered at the Institut d'Astrophysique in Paris to celebrate Gerard's 70th birthday and his remarkable career in Astronomy. The gathering also honored the memory of Antoinette who died 29 August 1987 after a long illness and her own no less remarkable career. This volume collects the 24 invited review papers and the 60 contributed poster papers presented at the meeting. Gerard de Vaucouleurs was born on 25 April 1918 in Paris where he spent his boyhood. He became an active amateur astronomer in the early 1930s making extensive observations of Mars, Jupiter and variable stars including the bright supernova of 1937 in IC 4182. He also began life-long interests in astronomical photography and galaxy cataloguing during this period. In 1939 he met the director of the Paris transport system and an equally avid amateur astronomer Julien Peridier. De Vaucouleurs worked at Peridier's private observatory at Le Houga in southwestern France on and off throughout the next decade. His undergraduate work was in mathematics, astronomy and experimental physics; this combined with his interest in observational astronomy formed his life-long empirical approach to science. After spending 18 months in the French army early in 1939, Gerard returned to the Peridier observatory and then in 1943 to his studies at the Sorbonne where he met Antoinette. **The Planetarian**, 1986
