Maurits Berger, 2025-09. International Studies aims to understand the global complexities of the world in which we live today. Central in these complexities is the position of the human individual who is both an actor and reactor in global events. This textbook introduces three I's: interests, identities, ideas that provide a framework to understand human behaviour in today's world. The role of people is further elaborated in the three spatial dimensions of the local, regional and global level. This gives International Studies the character of a 3-D chessboard with human players. Unique in this textbook is the framework of global scopes used for analysis of the global complexities: global structures such as economics, belief systems, states, intergovernmental organizations, global trends such as nationalism, power changes, secularization, identity and global challenges such as sustainable development, climate change, pandemics, unwanted migration. This textbook approaches International Studies as a field of study that enables students to navigate the framework of the three I's, the three spatial dimensions and the three global scopes. The International Studies student will acquire a broad overview of the various fields and disciplines and as a consequence the ability to move across traditional academic boundaries. **Introduction to**

International Relations Joseph Grieco, G. John Ikenberry, Michael Mastanduno, 2014-11-23. Written by three leading scholars in the field of International Relations, this textbook provides an authoritative introduction to the discipline including coverage of security studies, international political economy, international organizations and non-state actors. A comprehensive history chapter also helps students to appreciate the key developments that created today's political landscape. The book frames each chapter around an enduring question, long-standing dilemmas that have engaged generations of IR scholars and students such as why do wars occur and how can economic benefits be shared more equally, demonstrating the continuing relevance of these issues and ideas. A collection of innovative learning tools equips students with the skills they need for sound analysis of today's headlines. The textbook is ideal for undergraduate and master degree students who are taking introductory courses on International Relations, Global Politics and World Politics. **Advanced**
