Researchers and Educators **Relations: Concrete, Abstract, And Applied - An Introduction** Herbert Toth,2020-06-22

The book is intended as an invitation to the topic of relations on a rather general basis It fills the gap between the basic knowledge offered in countless introductory papers and books usually comprising orders and equivalences and the highly specialized monographs on mainly relation algebras many valued fuzzy relations or graphs This is done not only by presenting theoretical results but also by giving hints to some of the many interesting application areas also including their respective theoretical basics This book is a new and the first of its kind compilation of known results on binary relations It offers relational concepts in both reasonable depth and broadness and also provides insight into the vast diversity of theoretical results as well as application possibilities beyond the commonly known examples This book is unique by the spectrum of the topics it handles As indicated in its title these are Presumptions and Burdens of Proof Hans Vilhelm

Hansen,Fred J. Kauffeld,James B. Freeman,Lilian Bermejo-Luque,2019-05-28 An anthology of the most important historical sources classical and modern on the subjects of presumptions and burdens of proof In the last fifty years the study of argumentation has become one of the most exciting intellectual crossroads in the modern academy Two of the most central concepts of argumentation theory are presumptions and burdens of proof Their functions have been explicitly recognized in

legal theory since the middle ages but their pervasive presence in all forms of argumentation and in inquiries beyond the law including politics science religion philosophy and interpersonal communication have been the object of study since the nineteenth century However the documents and essays central to any discussion of presumptions and burdens of proof as devices of argumentation are scattered across a variety of remote sources in rhetoric law and philosophy Presumptions and Burdens of Proof An Anthology of Argumentation and the Law brings together for the first time key texts relating to the history of the theory of presumptions along with contemporary studies that identify and give insight into the issues facing students and scholars today The collection s first half contains historical sources and begins with excerpts from Aristotle s Topics and goes on to include the locus classicus chapter from Bishop Whately s crucial Elements of Rhetoric as well as later reactions to Whately s views The second half of the collection contains contemporary essays by contributors from the fields of law philosophy rhetoric and argumentation and communication theory These essays explore contemporary understandings of presumptions and burdens of proof and their role in numerous contexts today This anthology is the definitive resource on the subject of these crucial rhetorical modes and will be a vital resource to all scholars of communication and rhetoric as well as legal scholars and practicing jurists

(Generalized) Fuzzy Matrices And Relations Herbert Toth,2025-02-25 The book provides an overview of the main concepts and results related to fuzzy matrices and fuzzy relations using fuzzy in a general sense to mean many valued This overview along with numerous references to original contributions dispersed across various journals serves as a comprehensive guide for further exploration This volume can be viewed in two ways i as a companion to the author s previous work Relations Concrete Abstract and Applied published by WSPC 2020 but with a distinct emphasis on many valued concepts or ii as a standalone volume that can be read independently which necessarily includes some repetition of material from the earlier book as preliminary or reference content Similar to the previous book this one does not present new findings but offers a self contained compilation of known results selected from the extensive research conducted over the past five decades arranged in a systematic manner The topics covered in this text have been the subject of intensive research over the last two decades yet there has been no book publication on this subject for over 15 years This book aims to bridge that gap
