*Architectural Lighting* Hervé Descottes, Cecilia E. Ramos, 2013-07-02 Architectural Lighting the latest addition to the Architecture Briefs series provides both a critical approach to and a conceptual framework for understanding the application of lighting in the built environment The key considerations of lighting design are illuminated through accessible texts and instructional diagrams Six built projects provide readers with concrete examples of the ways in which these principles are applied Short essays by architect Steven Holl artist Sylvain Dubuisson and landscape architect James Corner explore the role of lighting in defining spatial compositions

Designing With Light Jason Livingston, 2014-10-23 A comprehensive introduction to the theory and practice of lighting design Designing With Light The Art Science and Practice of Architectural Lighting Design is a comprehensive introduction to the intelligent use of lighting to define and enhance a space The book explores all aspects of the process including aesthetics technology and practicalities in a clear concise manner designed to provide the reader with a full working knowledge of lighting design Color illustrations throughout demonstrate the real world effects of the concepts presented and the companion website offers video animations and exercises to better illuminate the art and science of lighting The book addresses the considerations that should be a part of any designer's process and provides thorough guidance on meeting the various demands with smarter design Lighting is an essential element of interior design and despite its ubiquity is difficult to truly master A designer with a fundamental and conceptual understanding of light is empowered to create simple typical spaces or work intelligently with lighting consultants on more complex projects Designing With Light contains special discussions on color light and health as well as the latest information on energy efficient lighting control systems and other technologies Topics include Physics psychology and perception of light Current and future lighting technology Communication documentation and the design process Sustainability daylighting and energy efficiency The book also contains an entire chapter on building and energy codes as well as practical guidance on photometrics and calculations Lighting can make or break an otherwise well designed space so designers need the background to be able to think intelligently about illumination factors during all stages of the process With comprehensive coverage and thorough explanation Designing With Light is a complete resource for students and professionals alike

**Philosophy for Architects** Branko Mitrovic, 2012-03-20 Philosophy for Architects is an engaging and easy to grasp introduction to philosophical questions of interest to students of architectural theory Topics include Aristotle's theories of visual imagination and their relevance to digital design the problem of optical correction as explored by Plato Hegel's theory of zeitgeist and Kant's examinations of space and aesthetics among others Focusing primarily on nineteenth and twentieth century philosophy it provides students with a wider perspective concerning philosophical problems that come up in contemporary architectural debates
