*Global Air Transport Management and Reshaping Business Models for the New Era* Kankaew, Kannapat, 2022-05-27 The air transport industry is highly vulnerable to environmental changes as was seen when the recent COVID 19 pandemic caused most airline operations to cease. However, for decades airlines have been collapsing around the globe as the business of managing airline operations has become stressed due to price competition. This is detrimental to air carriers since air transport products and services are the same. Moreover, it impacts other industries such as tourism, hotels, and restaurants, which contribute to the derailment of economic and social activities. Thus, it is essential to determine new practices and strategies that can allow air transport management to be enriched and to flourish. *Global Air Transport Management and Reshaping Business Models for the New Era* provides a comprehensive collection of knowledge on the new era of business management on air transport. It provides strategies, technologies, and tools used in the reshaping of the air transport business model.
