heyday of the big gun at sea it also saw the maturing of underwater weapons the mine and torpedo as well as the first signs of the future potency of air power Between 1914 and 1918 weapons development was both rapid and complex so this book has two functions on the one hand it details all the guns torpedoes mines aerial bombs and anti submarine systems employed during that period but it also seeks to explain the background to their evolution how the weapons were perceived at the time and how they were actually used This involves a discussion of tactics and emphasises the key enabling technology of fire control and gun mountings In this respect the book treats the war as a transition from naval weapons which were essentially experimental at its outbreak to a state where they pointed directly to what would be used in World War Two Based largely on original research this sophisticated book is more than a catalogue of the weapons offering insight into some of the most important technical and operational factors influencing the war at sea In this respect it is more broadly significant than its title might suggest
