The Circular Structure of Power Torben Bech Dyrberg, 1997 Few concepts in social theory have been used so extravagantly in recent years as the notion of power Yet despite its inflated presence the term is still unclear and undertheorized In *The Circular Structure of Power* Torben Dyrberg rises to the challenge of conceptualizing power through a philosophical examination of its uses in contemporary social theory Drawing on the insights of Michel Foucault Ernesto Laclau and Chantal Mouffe Dyrberg brings this continental tradition into a creative dialogue with the Anglo American tradition represented by figures such as Steven Lukes William Connolly Peter Bachrach and Morton Baratz Moreover Dyrberg moves from such abstract considerations to their implications for political and democratic theory through an examination of the work of thinkers as diverse as Robert Dahl John Rawls Jürgen Habermas and Nicos Poulantzas Simultaneously engaging with and defying many of the dominant definitions of power Torben Dyrberg destabilizes and undermines the conventional distinctions and polarities through which power is usually understood The new perspective offered to us by this investigation is one which goes beyond the assumption that power can be based on and derived from either agency or structure as if these categories themselves were not somehow constituted by power

European Union and the End of Politics James Heartfield, 2013-05-31 Europe is in crisis but the European Union just gets stronger Greece Portugal Spain and Ireland have all been told that they must submit their budgets to EU appointed bureaucrats The soft coup that put EU officials in charge of Greece and Italy shows that the Union is opposed to democracy Instead of weakening the European Union the budget crisis of 2012 has ended up with the eurocrats grabbing new powers to dictate terms Over the years the forward march of the European Union has been widely misunderstood James Heartfield explains that the rise of the EU is driven by the decline in political participation Without political contestation national parliaments have become an empty shell Where once elites drew authority from their own people today they draw authority from the European Union and other summits of world leaders The growth of the European Union runs in tandem with the decline in national politics As national sovereignty is hollowed out technocratic administration from Brussels fills the void This account of the rise of the European Union includes a full survey of the major schools of thought in European studies and

a valuable guide to those who want to take back control *Fifty Key Thinkers in International Relations* Martin Griffiths, 2013-03-07 First Published in 1999 Routledge is an imprint of Taylor Francis an informa company *Welcome to Cyberschool* David Trend, 2001-07-11 *Welcome to Cyberschool* is a book about two highly charged and often emotional discussions in today's society One concerns the optimism and promise surrounding information technologies of computers and the internet the other involves the growing pessimism and despair about the nation's schools These narratives of technological optimism and educational pessimism converge with increasing frequency as school groups community leaders and political rivals battle each other over the best way to wire the nation's schools computerize every classroom and leave no child behind *Welcome to Cyberschool* is the first book length analysis of this confluence of technology and education in the information age

Issues in Democratic Consolidation Scott Mainwaring, Guillermo A. O'Donnell, Julio Samuel Valenzuela, 1992 Since 1974 there has been an unprecedented wave of democratization in the world This trend has been particularly extensive in South America But the problems confronting these new democracies are staggering and the prospects for building consolidated democratic regimes are far from uniformly good Focusing primarily on recent South American cases *Issues in Democratic Consolidation* examines some of the difficulties of constructing consolidated democracies and provides a critical examination of the major issues involved A prominent theme running through this collection is that the transitions from authoritative rule to civilian government may be arrested by political economic and social constraints The articles contain analyses of the varied modalities and complex processes related to the transitions The first transition begins with the initial stirrings of crisis under authoritarian rule that generate some form of political opening and greater respect for basic civil rights and ends with the establishment of a government elected in an open competitive contest The volume's primary focus however is on the second transition which begins with the inauguration of a democratic government and ends if all goes well with the establishment of a consolidated democratic regime

Law, Justice and the State International Association for Philosophy of Law and Social Philosophy. World Congress, 1995 Proceedings of the 16th World Congress of the International Association for Philosophy of Law and Social Philosophy IVR Reykjavik 26 May 2 June 1993 T p

Nigeria Since Independence and the Impact of Non-governmental Organizations on Democratization Matthew Todd Bradley, 2003 The study traverses theoretical and conceptual frameworks both within and beyond the political science discipline with reference to the role of non governmental organizations in nurturing and sustaining democracy in Nigeria Explores the arrays of NGOs in Nigeria ranging from ethnic and religious spheres that helped transform the political sitting to support democratic transition

Rediscovering the Democratic Purposes of Education Lorraine McDonnell, P. Michael Timpane, Roger W. Benjamin, 2000 Why do America's public schools seem unable to meet today's social challenges As competing interest groups vie over issues like funding and curricula we seem to have lost sight of the democratic purposes originally intended for public

education Public schools were envisioned by the Founders as democratically run institutions for instilling civic values but today s education system seems more concerned with producing good employees than good citizens Meanwhile our country s diversity has eroded consensus about citizenship and the professionalization of educators has diminished public involvement in schools This volume seeks to demonstrate that the democratic purposes of education are not outmoded ideas but can continue to be driving forces in public education Nine original articles by some of today s leading education theorists cut a broad swath across the political spectrum to examine how those democratic purposes might be redefined and revived It both establishes the intellectual foundation for revitalizing American schools and offers concrete ideas for how the educational process can be made more democratic The authors make a case for better empirical research about the politics of education in order to both reconnect schools to their communities and help educators instill citizenship An initial series of articles reexamines the original premise of American education as articulated by important thinkers like Jefferson and Dewey A second group identifies flaws in how schools are currently governed and offers models for change A final section analyzes the value conflicts posed by the twin strands of democratic socialization and governance and their implications for education policy Spanning philosophy history sociology and political science this book brings together the best current thinking about the specifics of education policy vouchers charter schools national testing and about the role of deliberation in a democracy It offers a cogent alternative to the exchange paradigm and shows how much more needs to be understood about an issue so vital to America s future

Global Humanitarianism Robert D. DeChaine, 2005-10-13 In *Global Humanitarianism* NGOs and the Crafting of Community author Rob DeChaine explores a narrative common to the nongovernmental organization community about the promise and confusion of living together in post modern times Palpable in their affective admixture of idealism fear hope anger and uncertainty the protagonists of the story are humanitarian social actors engaged in a vivid social drama Their audience as made apparent by DeChaine s excellent scholarship is intimately engaged in the drama as well According to DeChaine the action takes shape in a multivocal polyphony of solidarity and at times cacophony of protest and dissent with actors mobilizing symbolic resources in the service of uniting a public who would join with them in the cause A major source of the actors labor is symbolic consisting in the successful rallying of formative energies in and around a cluster of key related terms words and phrases in order to dramatize and publicize the exigency of the crisis at hand DeChaine argues that crises are embodied in the form of an intensifying hegemonic struggle over the articulation of community in a global ized world The struggle brings into tension local and global priorities national governments and civil society and state centered forms of identity and allegiance and a broad based vision of global citizenship and belonging DeChaine demonstrates that the crisis of community is one of the defining themes of our contemporary era one that we ignore at our peril This book is not only important to the NGO community but represents cutting edge analysis in rhetoric cultural studies semiotics sociology and social organizations
