Beginning Database Driven Application Development In Java Ee Using Glassfish:

Beginning Database-Driven Application Development in Java EE Yuli Vasiliev,2009-04-21 Beginning Database Driven Application Development in JavaTM EE Using GlassFishTM focuses on the open source GlassFish persistence engine This book shows Java programmers how to develop applications utilizing relational database technologies with examples using Oracle and MySQL and the GlassFish application development framework and deployment platform all based on Java EE The book explains in detail how you can organize your Java EE solution into a multilayer architecture placing most emphasis on how to implement the persistence and database tiers of an application Through many examples this book shows how you can efficiently use the Java Persistence features available in the Java EE platform Find out how you can greatly simplify the task of building the persistence layer of your Java EE application by moving some application logic into the underlying database utilizing database views stored programs and triggers The book also explains how to deploy Java EE applications to GlassFish a free open source Java EE 5 compliant application server   Service Life Cycle Tools and Technologies: Methods, Trends and Advances Lee, Jonathan,Ma, Shang-Pin,Liu, Alan,2011-11-30 As Service Oriented Computing SOC gains a wider global acceptance the need for understanding its life cycle becomes inevitable not only for developers but also for users Service Life Cycle Tools and Technologies Methods Trends and Advances compiles the latest research on SOC life cycles detailing methodologies and applications in this emerging field The development of service oriented applications not only depends on constructing service providers but also composition and delivery Service requesters service providers and developers alike will benefit from the views and models in a service life cycle This volume offers research that has been conducted in both industry and academia to address issues in the SOC domain including service discovery service composition and service management It serves as a vital reference for those on either side of the service field   Java Ee 5 Development Using Glassfish Application Server David R. Heffelfinger,2007-01-01 The complete guide to installing and configuring the GlassFish Application Server and developing Java EE 5 applications to be deployed to this server   **Java EE 5 Development Using GlassFish Application Server** David R. Heffelfinger,2007 This is a guide to developing Java EE 5 applications deployed to the high performance Java EE 5 compliant GlassFish application server which is quickly gaining massive popularity After GlassFish installation and configuration it covers application development including all major Java EE 5 APIs JSPs JSTL Servlets and JSF for web applications the Java Persistence API and JDBC to interact with RDBMS EJB 3 including container managed transactions and EJB declarative security through annotations the JMS API for messaging the JAAS API for secure applications frameworks built on the Java EE 5 specification including Seam Facelets and Ajax4jsf It is aimed at Java developers wishing to become proficient with Java EE 5 who are expected to have some experience with Java and J2EE technologies and to have developed and deployed applications in the past but need no previous knowledge of Java EE and will teach the reader how to use GlassFish to develop and deploy applications   **Java Programming** Yakov

Fain,2015-04-27 Quick and painless Java programming with expert multimedia instruction Java Programming 24 Hour Trainer 2nd Edition is your complete beginner s guide to the Java programming language with easy to follow lessons and supplemental exercises that help you get up and running quickly Step by step instruction walks you through the basics of object oriented programming syntax interfaces and more before building upon your skills to develop games web apps networks and automations This second edition has been updated to align with Java SE 8 and Java EE 7 and includes new information on GUI basics lambda expressions streaming API WebSockets and Gradle Even if you have no programming experience at all the more than six hours of Java programming screencasts will demonstrate major concepts and procedures in a way that facilitates learning and promotes a better understanding of the development process This is your quick and painless guide to mastering Java whether you re starting from scratch or just looking to expand your skill set Master the building blocks that go into any Java project Make writing code easier with the Eclipse tools Learn to connect Java applications to databases Design and build graphical user interfaces and web applications Learn to develop GUIs with JavaFX If you want to start programming quickly Java Programming 24 Hour Trainer 2nd Edition is your ideal solution **Efficient Decision Support Systems** Chiang Jao,2011-09-09 This series is directed to diverse managerial professionals who are leading the transformation of individual domains by using expert information and domain knowledge to drive decision support systems DSSs The series offers a broad range of subjects addressed in specific areas such as health care business management banking agriculture environmental improvement natural resource and spatial management aviation administration and hybrid applications of information technology aimed to interdisciplinary issues This book series is composed of three volumes Volume 1 consists of general concepts and methodology of DSSs Volume 2 consists of applications of DSSs in the biomedical domain Volume 3 consists of hybrid applications of DSSs in multidisciplinary domains The book is shaped upon decision support strategies in the new infrastructure that assists the readers in full use of the creative technology to manipulate input data and to transform information into useful decisions for decision makers
