Abstract: - Transmission and storage of multimedia data like audio, video, and images over the Internet has increased in today's digital communication. Among the different multimedia data, images are transmitted and used very often. It is essential to protect the multimedia data from unauthorized disclosure during transmit. A novel approach for encrypting digital images using Matrix Reordering (MR), a kind of scanning, and simple XOR operation is proposed in this paper. The MR is applied to permute the pixel positions and the XOR operation is done to diffuse the pixel values. The bitwise XOR operation is performed using pseudorandom numbers generated by the linear congruential method. The image encryption algorithm evaluation parameters such as histogram, correlation, cut test, dispersion test, visual testing, and speed test have been conducted using the suggested method, and the results are analyzed. The analysis shows that the proposed system is resistant to statistical and differential attacks, and could be used in real-time applications to provide confidentiality service for images with less computational overhead.

Key-Words: - Information Security, Image Encryption, Matrix Reordering, Scan Pattern, Image Histogram, Image Correlation, Differential Attack.

1 Introduction

Information security has become a very critical aspect of modern computing systems to protect data from unauthorized access. Securing sensitive information has gained significant importance in the recent years, and security is an important issue in communication and storage. Approximately 20 million photos are viewed and 3,000 images are uploaded on Flickr per minute and 350 million photos are uploaded per day on Facebook. The security of digital images has become essential due to the rapid evolution of the Internet in the digital world and numerous image encryption methods have been proposed to secure digital images.

The conventional algorithms like Data Encryption Standard, International Data Encryption Algorithm, and Advanced Encryption Standard have certain limitations in multimedia data encryption and there is a need to develop specific encryption methods for multimedia data. Position change, value transformation and visual transformation are the different types of image encryption methods introduced by numerous researchers [2, 5, 8, 9, 13]. Chaos based image encryption using wavelet transforms, vector quantization, and random phase encoding for color image encryption are some of the

existing image encryption algorithms available in the literature [1, 3, 6, 14]. The advantage of an image encryption over traditional text encryption is that the decrypted image is tolerant with small distortion due to human perception.

1.1 Scan Methodology

The image scanning is a formal language-based two-dimensional spatial-accessing methodology which could efficiently specify and generate a wide range of scanning paths or space filling curves. The scan based pixel permutation and block transformation is a widely used technique for image encryption [2, 8]. Algorithms used to encrypt text messages are not sufficient to encrypt images due to the reasons like (a) image size is always greater than text messages and (b) conventional algorithms take a long time to encrypt digital images.

The objective of this paper is to propose a novel image encryption method based on scan methodology and simple XOR operation. The scan path is derived from the concept of matrix reordering and the random bit stream to perform XOR operation is obtained using Linear Congruential Generator (LCG).

Novel Image Encryption Technique Louis Tanach,2011 **A Novel Color Image Encryption Algorithm Based on Genetic Recombination and the Four-dimensional Memristive Hyperchaotic System*Project Supported by the National Natural Science Foundation of China (Grant Nos. 61203094 and 61305042), the Natural Science Foundation of the United States (Grant Nos. CNS-1253424 and ECCS-1202225), the Science and Technology Foundation of Henan Province, China (Grant No. 152102210048), the Foundation and Frontier Project of Henan Province, China (Grant No. 162300410196), the Natural Science Foundation of Educational Committee of Henan Province, China (Grant No. 14A413015), and the Research Foundation of Henan University, China (Grant No. Xxjc20140006).** ,2016 Abstract Recently many image encryption algorithms based on chaos have been proposed Most of the previous algorithms encrypt components R G and B of color images independently and neglect the high correlation between them In the paper a novel color image encryption algorithm is introduced The 24 bit planes of components R G and B of the color plain image are obtained and recombined into 4 compound bit planes and this can make the three components affect each other A four dimensional 4D memristive hyperchaotic system generates the pseudorandom key streams and its initial values come from the SHA 256 hash value of the color plain image The compound bit planes and key streams are confused according to the principles of genetic recombination then confusion and diffusion as a union are applied to the bit planes and the color cipher image is obtained Experimental results and security analyses demonstrate that the proposed algorithm is secure and effective so that it may be adopted for secure communication A New Encryption Algorithm for Image Cryptosystems Min-Shian Hwang,Chin-Chen Chang,Chen Tung-Shou,1996 **A Novel Image Encryption Scheme Based on Kepler's Third Law and Random Hadamard Transform *Project Supported by the National Natural Science Foundation of China (Grant Nos. 61661008 and 61603104), the Natural Science Foundation of Guangxi Zhuang Autonomous Region, China (Grant Nos. 2015GXNSFBA139256 and 2016GXNSFCA380017), the Funding of Overseas 100 Talents Program of Guangxi Provincial Higher Education, China, the Research Project of Guangxi University of China (Grant No. KY2016YB059), the Guangxi Key Laboratory of Multi-source Information Mining & Security, China (Grant No. MIMS15-07), the Doctoral Research Foundation of Guangxi Normal University, the Guangxi Provincial Experiment Center of Information Science, and the Innovation Project of Guangxi Graduate Education (Grant No. YCSZ2017055).** ,2017 Abstract In this paper a novel image encryption scheme based on Kepler s third law and random Hadamard transform is proposed to ensure the security of a digital image First a set of Kepler periodic sequences is generated to permute image data which is characteristic of the plain image and the Kepler s third law Then a random Hadamard matrix is constructed by combining the standard Hadamard matrix with the hyper Chen chaotic system which is used to further scramble the image coefficients when the image is transformed through random Hadamard transform In the end the permuted image presents interweaving diffusion based on two special matrices which are

constructed by Kepler periodic sequence and chaos system The experimental results and performance analysis show that the proposed encrypted scheme is highly sensitive to the plain image and external keys and has a high security and speed which are very suitable for secure real time communication of image data

Image Encryption Using Random Sequence Generated from Generalized Information Domain, 2016 Abstract A novel image encryption method based on the random sequence generated from the generalized information domain and permutation diffusion architecture is proposed The random sequence is generated by reconstruction from the generalized information file and discrete trajectory extraction from the data stream The trajectory address sequence is used to generate a P box to shuffle the plain image while random sequences are treated as keystreams A new factor called drift factor is employed to accelerate and enhance the performance of the random sequence generator An initial value is introduced to make the encryption method an approximately one time pad Experimental results show that the random sequences pass the NIST statistical test with a high ratio and extensive analysis demonstrates that the new encryption scheme has superior security

New Methods of Matrix Encryption

Thank you for downloading **A Novel Image Encryption Approach Using Matrix Reordering**. As you may know, people have look numerous times for their chosen books like this A Novel Image Encryption Approach Using Matrix Reordering, but end up in harmful downloads.

Rather than enjoying a good book with a cup of tea in the afternoon, instead they are facing with some harmful bugs inside their desktop computer.

A Novel Image Encryption Approach Using Matrix Reordering is available in our book collection an online access to it is set as public so you can get it instantly.

Our book servers hosts in multiple countries, allowing you to get the most less latency time to download any of our books like this one.

Kindly say, the A Novel Image Encryption Approach Using Matrix Reordering is universally compatible with any devices to read

A Novel Image Encryption Approach Using Matrix Reordering Introduction

A Novel Image Encryption Approach Using Matrix Reordering Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. A Novel Image Encryption Approach Using Matrix Reordering Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. A Novel Image Encryption Approach Using Matrix Reordering : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for A Novel Image Encryption Approach Using Matrix Reordering : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks A Novel Image Encryption Approach Using Matrix Reordering Offers a diverse range of free eBooks across various genres. A Novel Image Encryption Approach Using Matrix Reordering Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. A Novel Image Encryption Approach Using Matrix Reordering Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific A Novel Image Encryption Approach Using Matrix Reordering, especially related to A Novel Image Encryption Approach Using Matrix Reordering, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to A Novel Image Encryption Approach Using Matrix Reordering, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some A Novel Image Encryption Approach Using Matrix Reordering books or magazines might include. Look for these in online stores or libraries. Remember that while A Novel Image Encryption Approach Using Matrix Reordering, sharing copyrighted material without permission is not legal. Always ensure youre either

creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending services. Many libraries have digital catalogs where you can borrow A Novel Image Encryption Approach Using Matrix Reordering eBooks for free, including popular titles. Online Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short stories for free on their websites. While this might not be the A Novel Image Encryption Approach Using Matrix Reordering full book, it can give you a taste of the authors writing style. Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a wide range of A Novel Image Encryption Approach Using Matrix Reordering eBooks, including some popular titles.

FAQs About A Novel Image Encryption Approach Using Matrix Reordering Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. A Novel Image Encryption Approach Using Matrix Reordering is one of the best book in our library for free trial. We provide copy of A Novel Image Encryption Approach Using Matrix Reordering in digital format, so the resources that you find are reliable. There are also many Ebooks of related with A Novel Image Encryption Approach Using Matrix Reordering. Where to download A Novel Image Encryption Approach Using Matrix Reordering online for free? Are you looking for A Novel Image Encryption Approach Using Matrix Reordering PDF? This is definitely going to save you time and cash in something you should think about.
